Kenny Cupers, 2013-10-15 From participatory architecture to interaction design the question of how design accommodates use is driving inquiry in many creative fields Expanding utility to embrace people's everyday experience brings new promises for the social role of design But this is nothing new As the essays assembled in this collection show interest in the elusive realm of the user was an essential part of architecture and design throughout the twentieth century *Use Matters* is the first to assemble this alternative history from the bathroom to the city from ergonomics to cybernetics and from Algeria to East Germany It argues that the user is not a universal but a historically constructed category of twentieth century modernity that continues to inform architectural practice and thinking in often unacknowledged ways *The Portfolio and the Diagram*

Architecture Martin van der Linden, 2021-03-12 The question of what architecture is answered in this book with one sentence Architecture is space created for human activities The basic need to find food and water places these activities within a larger spatial field Humans have learned and found ways to adjust to the various contextual difficulties that they faced as they roamed the earth Thus rather than adapting humans have always tried to change the context to their activities Humanity has looked at the context not merely as a limitation but rather as a spatial situation filled with opportunities that allows through intellectual interaction to change these limitations Thus humanity has created within the world their own contextual bubble that firmly stands against the larger context it is set in The key notion of the book is that architecture is space carved out of and against the context and that this process is deterministic

Architectural Record , 1982 *CONVIVIA FILTH* Vera Bühlmann ,Riccardo M. Villa,Cris Argüelles ,2024-09-05 Convivia is a journal that is interested in thinking what architectonics is or could be in the twenty first century Pre specific to architecture architectonics deals with the real in an abstract yet edifying manner Under architectonics the indeterminacy brought by contemporary science is assumed as a liberation from ontological and epistemological principles and welcomed as a fortunate occasion to understand and embrace

the stating of any principle as an art in itself autonomous yet not automatic or autarkic Architectonic deals with the real in terms of a communicational physics through articulations that are concrete yet reasoned in abstractive and projective manners The journal aims to set the table for a series of banquets of convivia in which courses do not respond to mere needs or inconsequential delights of consumption We focus on architectonic alloys of necessities and contingencies necessities are bounded by contingencies and contingencies are engendered through figuring out what is necessary Convivia's interest is to make cases

Building a new New World Jean-Louis Cohen, 2021-01-12 An essential exploration of how Russian ideas about the United States shaped architecture and urban design from the czarist era to the fall of the U S S R Idealized representations of America as both an aspiration and a menace played an important role in shaping Russian architecture and urban design from the American Revolution until the fall of the Soviet Union Jean Louis Cohen traces the powerful concept of Amerikanizm and its impact on Russia's built environment from early czarist interest in Revolutionary America through the spectacular World's Fairs of the 19th century to department stores skyscrapers and factories built in Russia using American methods during the 20th century Visions of America also captivated the Russian avant garde from El Lissitzky to Moisei Ginzburg and Cohen explores the ongoing artistic dialogue maintained between the two countries at the mid century and in the late Soviet era following a period of strategic competition This first major study of Amerikanizm in the architecture of Russia makes a timely contribution to our understanding of modern architecture and its broader geopolitics

The Funambulist Papers Funambulist Papers, 2015-04-09 This book is the second volume of texts curated specifically for The Funambulist since 2011 The editorial line of this second series of twenty six essays is dedicated to philosophical and political questions about bodies This choice is informed by L opold Lambert's own interest in the often violent relation between the designed environment and bodies Corporeal politics do not exist in a void of objects buildings and cities on the contrary they operate through the continuous material encounters between living and non living bodies Several texts proposed in this volume examine various forms of corporeal violence racism gender based violence etc This examination however can only exist in the integration of the designed environment's conditioning of this violence As Mimi Thi Nguyen argues in the conclusion of this book's first chapter the process of attending to the body unhooded unveiled unclothed cannot be the solution to racism because that body is always already an abstraction an effect of law and its violence Although the readers won't find indications about the disciplinary background of the contributors the witty self descriptions at the end of the book being preferred to academic resumés the content of the texts will certainly attest to the broad imaginaries at work throughout this volume Dialogues between dancers and geographers between artists and biohackers between architects and philosophers and so forth provide the richness of this volume through difference rather than similarity The Funambulist Papers are published by the CTM Documents Initiative imprint Center for Transformative Media Parsons School of Design The New School CTM is a transdisciplinary media research initiative bridging design and the social sciences and dedicated to

the exploration of the transformative potential of emerging technologies upon the foundational practices of everyday life across a range of settings **Facilities Management** Keith Alexander, Brian Atkin, Jan Bröchner, Tore Haugen, 2004-08-02
