Zimring,2017-03-15 Tracing the benefits and limitations of repurposing aluminum Besides being the right thing to do for Mother Earth recycling can also make money particularly when it comes to upcycling a zero waste practice where discarded materials are fashioned into goods of greater economic or cultural value In Upcycling Aluminum Carl A

Zimring explores how the metal's abundance after World War II coupled with the significant economic and environmental costs of smelting it from bauxite ore led to the industrial production of valuable durable goods from salvaged aluminum. Beginning in 1886 with the discovery of how to mass produce aluminum, the book examines the essential part the metal played in early aviation and the world wars as well as the troubling expansion of aluminum as a material of mass disposal. Recognizing that scrap aluminum was as good as virgin material and much more affordable than newly engineered metal, designers in the postwar era used aluminum to manufacture highly prized artifacts. Zimring takes us on a tour of post-1940s design, examining the use of aluminum in cars, trucks, airplanes, furniture, and musical instruments from 1945 to 2015. By viewing upcycling through the lens of one material, Zimring deepens our understanding of the history of recycling in industrial society. He also provides a historical perspective on contemporary sustainable design practices. Along the way, he challenges common assumptions about upcycling's merits and adds a new dimension to recycling as a form of environmental absolution for the waste-related sins of the modern world. Raising fascinating questions of consumption, environment, and desire, *Upcycling Aluminum* is for anyone interested in industrial and environmental history, discard studies, engineering, product design, music history, or antiques.

Archie's Rivals in Teen Comics, 1940s-1970s Michelle Nolan, 2020-06-09 This is the first book to comprehensively examine the multitude of non-Archie teen humor comic books, including girls and boys such as Patsy Walker, Hedy Wolfe, Buzz Baxter, and Wendy Parker from Marvel; Judy Foster, Buzzy Binky, and Scribbly from DC; Candy from Quality Comics; and Hap Hazard from Ace Comics. It covers, often for the first time, the history of the characters who drew them, why or why not they succeeded as rivals for the Archie Series, highlights of both unusual and typical stories, and much more. The author provides major plotlines and a history of the development of each series. Much has been written about the Archie characters, but until now, very little has been told about most of their many comic book competitors.

[The Structure of American Industry](#) James W. Brock, 2015-07-28 The major American industries: agriculture, petroleum, electricity, banking, telecommunications, movies, college sports, airlines, health care, and the beer, cigarette, and automotive industries intersect our lives every day. Studying these industries raises a number of economic questions: How are the individual industries organized and structured? What is their history? What are the dominant organizations in each field, and what share of their market do they represent? What is the nature of competition in these fields, and how effectively does it govern economic decision making? The nature of these industries also raises a host of public policy challenges: What significant policy issues do they pose, what options are available for addressing them, and what role can and should the government play? Unlike other books that offer economic treatments focused on theoretical expositions and analyses, the thirteenth edition addresses all these questions in a

manner that treats each industry in a comprehensive holistic way Brock's approach focuses on everyday experience enhancing readers understanding through examples that emphasize incident and detail Each chapter written by an expert in the field has been updated or rewritten for this edition A new chapter on the movie industry has been added as well This outstanding overview of American industry offers the reader a live laboratory of clinical examination and comparative analysis
