Debt for Sale Brett Williams,2011-04-20

Credit and debt appear to be natural permanent facets of Americans lives but a debt based economy and debt financed lifestyles are actually recent inventions In 1951 Diners Club issued a plastic card that enabled patrons to pay for their meals at select New York City restaurants at the end of each month Soon other charge cards as they were then known offered the convenience for travelers throughout the United States to pay for hotels food and entertainment on credit In the 1970s the advent of computers and the deregulation of banking created an explosion in credit card use and consumer debt With gigantic national banks and computer systems that allowed variable interest rates consumer screening mass mailings and methods to discipline slow payers with penalties and fees middle class Americans experienced a sea change in their lives Given the enormous profits from issuing credit banks and chain stores used aggressive marketing to reach Americans experiencing such crises as divorce or unemployment to help them make ends meet or to persuade them that they could live beyond their means After banks exhausted the profits from this group of people they moved into the market for college credit cards and student loans and then into predatory lending through check cashing stores and pawnshops to the poor In 2003 Americans owed nearly 8 trillion in consumer debt amounting to 130 percent of their average disposable income The role of credit and

debt in people's lives is one of the most important social and economic issues of our age Brett Williams provides a sobering and frank investigation of the credit industry and how it came to dominate the lives of most Americans by propelling the social changes that are enacted when an economy is based on debt Williams argues that credit and debt act to obscure reproduce and exacerbate other inequalities It is in the best interest of the banks corporations and their shareholders to keep consumer debt at high levels By targeting low income and young people who would not be eligible for credit in other businesses these companies are able quickly to gain a stranglehold on the finances of millions Throughout Williams provides firsthand accounts of how Americans from all socioeconomic levels use credit These vignettes complement the history and technical issues of the credit industry including strategies people use to manage debt how credit functions in their lives how they understand their own indebtedness and the sometimes tragic impact of massive debt on people's lives *New Money* Lana Swartz, 2020-05-01 A new vision of money as a communication technology that creates and sustains invisible often exclusive communities One of the basic structures of everyday life money is at its core a communication media Payment systems cash card app or Bitcoin are informational and symbolic tools that integrate us into or exclude us from the society that surrounds us Examining the social politics of financial technologies Lana Swartz reveals what's at stake when we pay This accessible and insightful analysis comes at a moment of disruption from fin tech startups to cryptocurrency schemes a variety of technologies are poised to unseat traditional financial infrastructures Swartz explains these changes traces their longer histories and demonstrates their consequences Getting paid and paying determines whether or not you can put food on the table She shows just how important these invisible systems are The data that payment produces is uniquely revelatory and newly valuable New forms of money create new forms of identity new forms of community and new forms of power
