EV - Electric Vehicles Come Home Dale Stubbart, In my first book on Electric Cars I covered those which were available in the US In my new book I decided to cover the world I also venture into Electric Planes and EVTOLS Electric Vertical Takeoff and Landing machines Even though EVs are very interesting you might get bored after the 100th or so To relieve your boredom I inserted stories about my visits from a couple of outer space aliens who are very interested in Electric Cars Who says you can't mix research books with sci fi and humor I start with the most popular EVs I cover many parts of the globe And I cover lesser known Electric cars Some places around the world don't have good roads or the roads are too crowded There electric motorcycles rickshaws and other vehicles are more popular than electric cars And did you know that there's an electric skateboard Electric Cars come in several models Sedans SUVs Crossovers Hatchbacks etc There are even little electric bubble cars And there's an Amphibious E Tricycle Camper Now is a good time to get into an EV there's availability You'll get good range And you'll save money on gas and maintenance Besides bans on ICE vehicles internal combustion engine petrol powered cars are coming Maybe not tomorrow but soon And supermost of all owning an EV is cool and the wave of the future And you want to get into the action now because you want to ride the crest of the wave Some people are still worried about what happens if the battery dies I cover that Good news not a problem I also cover converting your car to an EV or rather hiring someone to do that for you and EV Rentals I conclude the book with what it would take to own an EV Dealership My EV choices and statements by World Leaders on EVs I evaluate the more popular cars and provide a blank evaluation form so you can make your own evaluations This book is packed with information but I keep it light so you won't get bored Actually that's not true I kept it light so that I wouldn't get bored

Advances in Stochastic Dynamic Programming for Operations Management Frank Schneider,2014 Many tasks in operations management require the solution of complex optimization problems Problems in which decisions are taken sequentially over time can be modeled and solved by dynamic programming Real world dynamic programming problems however exhibit complexity that cannot be handled by conventional solution techniques This complexity may stem from large state and solution spaces huge sets of possible actions non convexities in the objective function and uncertainty In this book three highly complex real world problems from the domain of operations management are modeled and solved by newly developed solution techniques based on stochastic dynamic programming First the problem of optimally scheduling participating demand units in an energy transmission network is considered These units are scheduled such that total cost of supplying demand for electric energy is minimized under uncertainty in demand and generation Second the integrated problem of investment in and optimal operations of a network of battery swap stations under uncertain demand and energy prices is modeled and solved Third the inventory control problem of a multi channel retailer selling through independent sales channels is modeled and optimality conditions for replenishment policies of simple structure are proven This book introduces efficient approximation techniques based on approximate dynamic programming ADP and extends existing proximal point algorithms to the stochastic case The methods are applicable to a wide variety of dynamic programming problems of high dimension
