Rent Cultural Anthropology 1st Edition:

FairEconomy Wolfgang Fikentscher, Philipp Hacker, Rupprecht Podszun, 2013-03-14 FairEconomy is a concept for a free and fair market economy In response to the financial and economic crises of the past years the authors develop fundamental ideas of how a market economy works what rules markets need and who safeguards fairness and equal opportunity in such an economy The book sets out the design of a sustainable market order Going back to the very roots of doing business it offers a fascinating insight into the cultural and anthropological premises of the market economy Fairness and free competition can be identified as key elements of successful markets sometimes neglected in politics and business Legal rules need to ensure that fairness and economic freedom work The same holds true for the relationship of risk and liability that has been overlooked in the banking sector The ideas of a FairEconomy sketched in this book are fit to become a reality The authors point to institutions and mechanisms that could integrate the concept into global law They place their trust less upon ever larger institutions and more on private entitlement and enforcement at the global regional and local levels

Cultural Anthropology John H. Bodley, 2011-04-16 This introductory text introduces basic concepts in cultural anthropology by comparing cultures of increasing scale and focusing on specific universal issues throughout human history Cultural materials are presented in integrated ethnographic case studies organized by cultural and geographic areas to show how ideological social organization and material features fit together in specific sociocultural systems John H Bodley explicitly seeks a balance between ecological materialist and cultural ideological explanations of sociocultural systems while stressing the importance of individual power seeking and human agency Part One examines domestic scale autonomous tribal cultures Part Two presents politically organized class based civilizations and ancient empires in the imperial world Part Three surveys global industrial market based civilizations in the contemporary commercial world Cultural Anthropology uniquely challenges students to consider the big questions about the nature of cultural systems

Anthropology and Contemporary Human Problems John H. Bodley, 2012-04-12 We live in a time of global mega problems of unsustainable growth and consumption resource depletion ecosystem degradation global warming escalating energy costs poverty and conflict Cultural anthropologist John H Bodley trenchantly critiques these most pressing issues and shows how anthropology makes it possible to find solutions The focus on culture scale suggests that many solutions may be found by developing local communities supported by regional markets and ecosystems rather than by making the continuous accumulation of financial capital the dominant cultural process throughout the world Now in its sixth edition this classic textbook continues to have tremendous relevance and is more timely than ever in light of the recent global economic crisis It exposes readers to the problems of a world out of balance with misdirected growth by the elite Bodley offers examples from prehistoric and modern tribal societies along side of ancient imperial and contemporary commercial societies Students will find this to be the trusted source to build a world view Anthropology and Contemporary Human Problems is ideal for adoption in anthropology and sociology courses
