**Material Matters** Thomas Rau, Sabine Oberhuber, 2022-12-30 Our planet is a closed system with limited material resources yet our current economic model is designed in a one way direction from resource extraction to disposal

leading to resource depletion This book proposes a new economic model offering an alternative to this linear take make waste economy Material Matters shows a way of creating a circular economy by using the unlimited resources we have renewable energy data and intelligence It describes a system based on circular business models centred on selling performance rather than ownership designing products and buildings as resource banks and equipping products with a material passport to ensure their usability for future generations Businesses thereby become custodians of materials rather than consumers of materials and sellers of products The book evokes the vision of a radically new economic model based on a compelling narrative supported with cases that have been developed in conjunction with major companies for example convincing Philips to sell light instead of lamps saving energy and materials by creating a whole new business model a case which has become iconic for the circular economy Material Matters is not a somber analysis of the state of the planet but a concrete and comprehensive agenda for change offering perspectives for taking action for business and individual consumers alike
