## Waterproof 40A Brushless Electronic Speed Control (ESC)

### Instruction Manual

Thank you for choosing the Pro Boat® brand. Your satisfaction is our number one priority. With this in mind, we have produced this product to be of the highest quality, performance and reliability, and at a "value-packed" price. We hope it provides you with hours of enjoyment in your next R/C project.

### Features

- Low limiter allows brief operation of the motor out of the water to protect the motor and drivetrain components.
- Water cooled for optimum performance without the need for large heat sinks.
- The soft start feature slightly limits current to increase the life of the electronic components.
- The ESC also features a cutoff voltage indicator that will stop the motor from operating if the batteries are reaching full discharge. To reset, return the throttle to neutral and bring the boat to shore at low throttle and recharge batteries.

- High-power FET control with proportional forward
- High-frequency design delivers smooth speed transition
- Pre-wired with Dean's battery plug, bullet-style motor connectors and universal receiver plug that fit JR, Hitec, Airtronics Z, Futaba and new KO radios
- Pre-programmed for use with Ni-MH batteries. Can be programmed for use with Li-Po batteries with P8B3313 Programming Module (sold separately)

### Specifications

**Operation:** Proportional forward

**Minimum input voltage:** 10V

**Maximum input voltage:** 21V

**BEC voltage:** 5.0V

**BEC current limit:** 5A

**continuous current maximum:** 45A

**Peak current maximum:** 51A

### Mounting the Speed Control

**Note:** Be sure all wiring connections can be reached prior to mounting.

Mount the Pro Boat ESC in the location specified by your boat's instruction manual. Use the double-sided foam tape (not included) to secure the speed control in position.

### Diagram

### Wiring the Receiver

**Note:** The Pro Boat ESC uses the motor battery to supply power to the receiver. There is no need for a separate receiver battery.

- See your radio's instruction manual for proper connection. Typically, channel 2 is used to control the throttle.
- There are three wires involved in the universal receiver connector. It is directly compatible with JR, Hitec, Airtronics Z, Futaba and new KO systems.
- Older Airtronics or KO radio systems must use a modified wiring order.

1. The positive (red) and negative (brown) wires must be reversed to operate with these radio systems. To remove the wires from the plug use a small jeweler's screwdriver to pry up the plastic tab associated with each wire. Gently slide the brown wire out of the plug. Repeat on the red wire and replace in the opposite positions.
2. Install the ESC receiver plug into channel 2 or the throttle channel of the receiver. Install the plug referencing the wire colors on the steering servo for proper polarity.

### Connecting the Motor Wires

Connect all three wires to the motor in any order. If the motor runs backwards, simply switch any two wires.

### Connecting the Battery

The Pro Boat ESC comes pre-wired with Dean's-style connectors, compatible with most high-power battery packs.

Proboat offers a P8B3313 3600mAh Ni-MH pack and a P8B3314 4200mAh high capacity Ni-MH battery with Dean's connectors for use with this ESC.

1. Be sure the On/Off switch is in the Off position.
2. Connect two fully charged 6-cell Ni-MH sub-C battery packs to the speed control's battery connectors.
