Physical Science Nov 2012 Exemplar Paper1:

Knowledge Production and Contradictory Functions in African Higher Education Nico Cloete, Peter Maassen, 2015-03-01

The dominant global discourse in higher education now focuses on world class universities inevitably located predominantly in North America Europe and increasingly East Asia The rest of the world including Africa is left to play catch up But that discourse should focus rather on the tensions even contradictions between excellence and engagement with which all universities must grapple Here the African experience has much to offer the high participation and generously resourced systems of the so called developed world This book offers a critical review of that experience and so makes a major contribution to our understanding of higher education

The Age of Scientific Naturalism Bernard Lightman, Michael S. Reidy, 2016-02-19

Physicist John Tyndall and his contemporaries were at the forefront of developing the cosmology of scientific naturalism during the Victorian period They rejected all but physical laws as having any impact on the operations of human life and the universe Contributors focus on the way Tyndall and his correspondents developed their ideas through letters periodicals and scientific journals and challenge previously held assumptions about who gained authority and how they attained and defended their position within the scientific community

Earthmasters Clive Hamilton, 2013-02-15

DIV This book goes to the heart of the unfolding reality of the twenty first century international efforts to reduce greenhouse gas emissions have all failed and before the end of the century Earth is projected to be warmer than it has been for 15 million years The question can the crisis be avoided has been superseded by a more frightening one what can be done to prevent the devastation of the living world And the disturbing answer now under wide discussion both within and outside the scientific community is to seize control of the very climate of the Earth itself

div DIV div DIV Clive Hamilton begins by exploring the range of technologies now being developed in the field of geoengineering the intentional enduring large scale manipulation of Earth's climate system He lays out the arguments for and against climate engineering and reveals the extent of vested interests linking researchers venture capitalists and corporations He then examines what it means for human beings to be making plans to control the planet's atmosphere probes the uneasiness we feel with the notion of exercising technological mastery over nature and challenges the ways we think about ourselves and our place in the natural world

div Science Fictions Stuart Ritchie, 2020-07-21 An insider's view of science reveals why many scientific results cannot be relied upon and how the system can be reformed Science is how we understand the world Yet failures in peer review and mistakes in statistics have rendered a shocking number of scientific studies useless or worse badly misleading Such errors have distorted our knowledge in fields as wide ranging as medicine physics nutrition education genetics economics and the search for extraterrestrial life As Science Fictions makes clear the current system of research funding and publication not only fails to safeguard us from blunders but actively encourages bad science with sometimes deadly consequences Stuart Ritchie's own work challenging an infamous psychology experiment helped spark what is now widely known as the replication crisis the realization that supposed scientific truths are often just plain wrong Now he reveals the very human biases misunderstandings and deceptions that undermine the scientific endeavor from contamination in science labs to the secret vaults of failed studies that nobody gets to see from outright cheating with fake data to the more common but still ruinous temptation to exaggerate mediocre results for a shot at scientific fame Yet Science Fictions is far from a counsel of despair Rather it's a defense of the scientific method against the pressures and perverse incentives that lead scientists to bend the rules By illustrating the many ways that scientists go wrong Ritchie gives us the knowledge we need to spot dubious research

and points the way to reforms that could make science trustworthy once again

Reading as a Philosophical Practice Robert Piercey, 2020-12-15 Reading as a Philosophical Practice asks why reading everyday reading for pleasure matters so profoundly to so many people Its answer is that reading is an implicitly philosophical activity To passionate readers it is a way of working through and taking a stand on certain fundamental questions about who and what we are how

we should live and how we relate to other things The book examines the lessons that the activity of reading seems to teach about selfhood morality and ontology and it tries to clarify the sometimes paradoxical claims that serious readers have made about it To do so it proposes an original theoretical framework based on Virginia Woolf's notion of the common reader and Alasdair MacIntyre's conception of practice It also asks whether reading can continue to play this role as paper is replaced by electronic screens

The Physiology of Sexist and Racist Oppression Shannon Sullivan, 2015-07-01 While gender and race often are considered socially constructed this book argues that they are physiologically constituted through the biopsychosocial effects of sexism and racism This means that to be fully successful critical philosophy of race and feminist philosophy need to examine not only the financial legal political and other forms of racist and sexism oppression but also their physiological operations Examining a complex tangle of affects emotions knowledge and privilege *The Physiology of Sexist and Racist Oppression* develops an understanding of the human body whose unconscious habits are biological On this account affect and emotion are thoroughly somatic not something mental or extra biological layered on top of the body They also are interpersonal social and can be transactionally transmitted between people Ranging from the stomach and the gut to the hips and the heart from autoimmune diseases to epigenetic markers Sullivan demonstrates the gastrointestinal effects of sexual abuse that disproportionately affect women often manifesting as IBS Crohn's disease or similar functional disorders She also explores the transgenerational effects of racism via epigenetic

changes in African American women who experience much higher pre term birth rates than white women do and she reveals the unjust benefits for heart health experienced by white people as a result of their racial privilege Finally developing the notion of a physiological therapy that doesn t prioritize bringing unconscious habits to conscious awareness Sullivan closes with a double barreled approach for both working for institutional change and transforming biologically unconscious habits The Physiology of Sexist and Racist Oppression skillfully combines feminist and critical philosophy of race with the biological and health sciences The result is a critical physiology of race and gender that offers new strategies for fighting male and white privilege

Sport Development in the United States Peter Smolianov,Dwight Zakus,Joseph Gallo,2014-09-15 The development of both elite high performance sport and mass participation grassroots level sport are central concerns for governments and sports governing bodies This important new study is the first to closely examine the challenges and opportunities for sports development in the United States a global sporting giant with a unique market driven sporting landscape Presenting an innovative model of integrated sports development the book explores the inter relationship between elite and mass sport across history drawing on comparative international examples from Australia to the former USSR and Eastern bloc countries At the heart of the book is an in depth empirical study of three traditional and emerging sports in the US tennis soccer and rugby that offer important lessons on the development of elite sport methods for increasing participation and the establishment of new sports in new markets No other book has attempted to model sports development in the United States in such depth before Therefore this should be essential reading for all students researchers administrators or policy makers with an interest in sports development sports management sports policy or comparative international sport studies
