Crime, Violence, and Global Warming John Crank,Linda Jacoby,2015-05-20 Crime Violence and Global Warming introduces the many connections between climate change and criminal activity Conflict over natural resources can escalate to state and non state actors resulting in wars asymmetrical warfare and terrorism Crank and Jacoby apply criminological theory to each aspect of this complicated web helping readers to evaluate conflicting claims about global warming and to analyze evidence of the current and potential impact of climate change on conflict and crime Beginning with an overview of the science of global warming the authors move on to the links between climate change scarce resources and crime Their approach takes in the full scope

of causes and consequences present and future in the United States and throughout the world The book concludes by looking ahead at the problem of forecasting future security implications if global warming continues or accelerates This fresh approach to the criminology of climate change challenges readers to examine all sides of this controversial question and to formulate their own analysis of our planet s future **Law, Death, and Robots** Keri Grieman,2024-10-17 Can the law keep up with AI This book examines liability and regulation for artificial intelligence causing serious physical harm both now and in the future While AI moves quickly regulation follows more slowly an increasing problem for an evolutionary fast paced emerging technology AI has the potential to save lives but in doing so will have the potential to take them as well How do we future proof law and regulation to incentivise life saving innovation as safely as possible This book details how to regulate AI in high risk civil applications for example automated vehicles and medicine addressing both liability and regulatory structure It highlights crucial liability themes for technology governance provides tools to bridge the gap between regulators and technologists examines jurisdictional approaches to AI regulation in the EU UK USA and Singapore and ultimately suggests a jurisdiction agnostic blueprint for regulation **Writing for Their Lives** Marcel Chotkowski LaFollette,2023-08-22 A breathtaking history of America s trail blazing female science journalists and the timely lessons they can teach us about equity access collaboration and persistence Writing for Their Lives tells the stories of women who pioneered the nascent profession of science journalism from the 1920s through the 1950s Like the hidden figures of science such as Dorothy Vaughan and Katherine Johnson these women journalists Marcel Chotkowski LaFollette writes were also overlooked in traditional histories of science and journalism But at a time when science medicine and the mass media were expanding dramatically Emma Reh Jane Stafford Marjorie Van de Water and many others were explaining theories discoveries and medical advances to millions of readers via syndicated news stories weekly columns weekend features and books and they deserve the recognition they have long been denied Grounded in extensive archival research and enlivened by passages of original correspondence Writing for Their Lives addresses topics such as censorship peer review and news embargoes while also providing intimate glimpses into the personal lives and adventures of mid twentieth century career women They were single married or divorced mothers with child care responsibilities daughters supporting widowed mothers urban dwellers who lived through and wrote about the Great Depression World War II and the dawn of the Atomic Age all the while daring to challenge the arrogance and misogyny of the male scientific community in pursuit of information that could serve the public Written at a time when trust in science is at a premium Writing for Their Lives is an inspiring untold history that underscores just how crucial dedicated conscientious journalists are to the public understanding and acceptance of scientific guidance and expertise **The Vortex** Frank Uekötter,2024-04-18 Environmental challenges are defining the twenty first century To fully understand ongoing debates about our current crises climate change loss of biological diversity pollution extinction resource woes means revisiting their origins in all their complexity With this ambitious highly original contribution to the

environmental history of global modernity Frank Uek tter considers the many ways humans have had an impact on their physical environment throughout history Ours is not a one way trajectory to sudden collapse he argues but rather death by a thousand cuts The many paths we ve forged to arrive in our current predicament from agriculture to industry to infrastructure must be considered collectively if we are to stay afloat in what Uek tter describes as a vortex a powerful metaphor for the flow of history capturing the momentum and the many crosscurrents that swept people and environments along His book invites us to look at environmental challenges from multiple perspectives including all the twists and turns that have helped to create the mess we find ourselves in Uek tter has written a world history for an age where things are falling apart where we know what lies ahead and are equipped with the right tools technological and otherwise and plenty of experience to deal with environmental challenges but somehow fail to get our affairs in order

Forestry and Water

Conservation in South Africa Brett Bennett,Fred Kruger,2015-11-11 This innovative interdisciplinary study focuses on the history science and policy of tree planting and water conservation in South Africa South Africa s forestry sector has sat often controversially at the crossroads of policy and scientific debates regarding water conservation economic development and biodiversity protection Bennett and Kruger show how debates about the hydrological impact of exotic tree planting in South Africa shaped the development of modern scientific ideas and state policies relating to timber plantations water conservation invasive species control and biodiversity management within South Africa as well as elsewhere in the world Forestry and Water Conservation in South Africa shows how scientific research on the impact of exotic and native vegetation led to the development of a comprehensive national policy for conserving water producing timber and protecting indigenous species from invasive alien plants Policies and laws relating to forests and water began to change in the late 1980s and early 1990s as a result of political and administrative changes within South Africa This book suggests that the country s contemporary policies towards timber plantations guided by the National Water Act of 1998 need to be reconsidered in light of the authors findings Bennett and Kruger also call for more interdisciplinary research and greater emphasis on integrated policies and management plans for forestry invasive alien plants water conservation and biodiversity preservation

Cybersecurity

Damien Van Puyvelde,Aaron F. Brantly,2024-09-27 In the last decade the proliferation of billions of new Internet enabled devices and users has significantly expanded concerns about cybersecurity How much should we worry about cyber threats and their impact on our lives society and international affairs Are these security concerns real exaggerated or just poorly understood In this fully revised and updated second edition of their popular text Damien Van Puyvelde and Aaron F Brantly provide a cutting edge introduction to the key concepts controversies and policy debates in cybersecurity today Exploring the interactions of individuals groups and states in cyberspace and the integrated security risks to which these give rise they examine cyberspace as a complex socio technical economic domain that fosters both great potential and peril Across its ten chapters the book explores the complexities and challenges of cybersecurity using new case studies such as NotPetya and

Colonial Pipeline to highlight the evolution of attacks that can exploit and damage individual systems and critical infrastructures This edition also includes reader s guides and active learning exercises in addition to questions for group discussion Cybersecurity is essential reading for anyone interested in understanding the challenges and opportunities presented by the continued expansion of cyberspace

Forging a Socio-Legal Approach to Environmental Harms

Tiffany Bergin,Emanuela Orlando,2017-06-14 Environmental harms exert a significant toll and pose substantial economic costs on societies around the world Although such harms have been studied from both legal and social science perspectives these disciplinary specific approaches are not on their own fully able to address the complexity of these environmental challenges Many legal approaches for example are limited by their inattention to the motivations behind environmental offences whereas many social science approaches are hindered by an insufficient grounding in current legislative frameworks This edited collection constitutes a pioneering attempt to overcome these limitations by uniting legal and social science perspectives Together the book s contributors forge an innovative socio legal approach to more effectively respond to and to prevent environmental harms around the world Integrating theoretical and empirical work the book presents carefully selected illustrations of how legal and social science scholarship can be brought together to improve policies The various chapters examine how a socio legal approach can ultimately lead to a more comprehensive understanding of environmental harms as well as to innovative and effective responses to such environmental offences

India and the Anglosphere

Alexander Davis,2018-12-07 India has become known in the US the UK Canada and Australia as the world s largest democracy a natural ally the democratic counterweight to China and a trading partner of massive economic potential This new foreign policy orthodoxy assumes that India will join with these four states and act just as any other democracy would A set of political and think tank elites has emerged which seek to advance the cause of a culturally superior if ill defined Anglosphere Building on postcolonial and constructivist approaches to international relations this book argues that the same Eurocentric assumptions about India pervade the foreign policies of the Anglosphere states international relations theory and the idea of the Anglosphere The assertion of a shared cultural superiority has long guided the foreign policies of the US the UK Canada and Australia and this has been central to these states relationships with postcolonial India This book details these difficulties through historical and contemporary case studies which reveal the impossibility of drawing India into Anglosphere type relationships At the centre of India Anglosphere relations then is not a shared resonance over liberal ideals but a postcolonial clash over race identity and hierarchy A valuable contribution to the much needed scholarly quest to follow a critical lens of inquiry into international relations this book will be of interest to academics and advanced students in international relations Indian foreign policy Asian studies and those interested in the Anglosphere as a concept in international affairs
