Pediatric Critical Care Study Guide Steven E. Lucking, Frank A. Maffei, Robert F. Tamburro, Neal J. Thomas, 2012-04-10

This is the first comprehensive study guide covering all aspects of pediatric critical care medicine. It fills a void that exists in learning resources currently available to pediatric critical care practitioners. The major textbooks are excellent references but do not allow concise reading on specific topics and are not intended to act as both text and study guide. There are also several handbooks available but these are usually written for general pediatric residents and lack the advanced physiology and pathophysiology required for the higher level pediatric critical care practitioner. *Motor Learning and Performance, 5E With Web Study Guide* Richard Schmidt, Tim Lee, 2013-10-29. Combines a conceptual model of motor performance with a principles to application learning approach making comprehension of the principles of motor performance and learning accessible even for students with little or no knowledge of physiology, psychology, statistical methods, and other basic sciences.
