Technology For Transformation Libbi R. Miller, Daniel Becker, Katherine Becker, 2016-04-01 This book serves as a platform for educators and researchers to unite educational technology and social justice While educational technology is a rapidly changing and progressive field of research and practice it remains largely separate from education for social justice Current literature about educational technology is often approached from a technical how to perspective that emphasizes

ways to implement technology into the classroom Technology is often viewed as inevitable yet neutral and value free Educational technology however is anything but neutral The contributors collectively advance a hopeful discourse by exploring the potential of technology as a vehicle to transform and emancipate while not forgoing a critically reflective measure of self conscious critique of our own role as educators students or scholars in oppressive silences constraints and conditions This edited collection makes an important and unique contribution to the field as it will be the first published volume to detail research theory and practice regarding student use of technology in achieving liberatory aims since IAP s 2009 publication ICT for Education Development and Social Justice The fields of educational technology and social justice are vast and applicable in many domains including teacher education graduate programs and K 12 education This work is intended to appeal to a diverse academic and professional audience of K 12 teachers teacher educators educational technology and social justice scholars and policy makers Scholars and academics instructing graduate level educational technology courses can reference this edited collection as the most current text on socially just educational technology Educational practitioners from teacher education programs and the K 12 sector may use this book as a source of ideas and inspiration to incorporate student use of technology toward emancipatory aims. This title could be adopted as a course text for both undergraduate and graduate education courses in media literacy digital literacy distance education education for social justice and teacher preparation and educational technology courses Readers will also be able to use the book as a guide when critically analyzing their own professional practice whether it is in research working with K 12 students or preparing future educators or scholars **Experimenting with Religion** Jonathan Jong, 2023 This book showcases several experiments as examples of how psychologists can study religion and spirituality casting a light on both the ingenuity and limitations of each Ultimately this book demonstrates that such scientific experiments are works of imagination that can help us discover truths about the human mind s proclivity for religious ideas as long as we can adapt and learn along the way
