Let's Learn About OCEANS!

DO YOU KNOW?

Oceans are amazing! They cover most of the earth's surface and are "home" to many types of animals and fish. Let's learn more about them!

Earth is the only planet in our solar system with oceans. Many animals live in oceans, but oceans are important for many other reasons, too. Did you know oceans help keep Earth warm during winter and cool during summer? Also, many people's jobs depend on the oceans, such as fishermen and scientists. Can you think of other reasons our oceans are important?

THE FIVE OCEANS
(from largest to smallest)

- 1. Pacific
- 2. Atlantic
- 3. Indian
- 4. Southern
- 5. Arctic

FUN FACT!

The oceans are so large that they cover more than 70% of the Earth's surface. That's about 70% of the planet's surface! The oceans are also home to many different types of animals and plants.

More About MOUNTAINS!

Many mountains have steep sides and colder weather than lower areas of land. The main reason for this is that mountains are high above the ground. It is more common for low mountains used for **recreation**. This means people like to have fun and do activities on mountains, such as skiing, tubing, and mountain climbing.

FUN FACT!
