**The Gifted Generation** David Goldfield, 2017-11-14 A sweeping and path breaking history of the post World War II decades during which an activist federal government guided the country toward the first real flowering of the American Dream In *The Gifted Generation* historian David Goldfield examines the generation immediately after World War II and argues that the federal government was instrumental in the great economic social and environmental progress of the era Following the sacrifices of the Greatest Generation the returning vets and their children took the unprecedented economic growth and federal activism to new heights This generation was led by presidents who believed in the commonwealth ideal the belief that federal legislation by encouraging individual opportunity would result in the betterment of the entire nation In the years after the war these presidents created an outpouring of federal legislation that changed how and where people lived their access to higher education and their stewardship of the environment They also spearheaded historic efforts to level the playing field for minorities women and immigrants But this dynamic did not last and Goldfield shows how the shrinking of the federal government shut subsequent generations off from those gifts David Goldfield brings this unprecedented surge in American legislative and cultural history to life as he explores the presidencies of Harry S Truman Dwight D Eisenhower and Lyndon Baines Johnson He brilliantly shows how the nation's leaders persevered to create the conditions for the most gifted generation in U S history

members of the United States Congress promulgated the Declaration of Constitutional Principles popularly known as the Southern Manifesto Reprinted here the Southern Manifesto formally stated opposition to the landmark United State Supreme Court decision Brown v Board of Education and the emergent civil rights movement This statement allowed the white South to prevent Brown s immediate full scale implementation and for nearly two decades set the slothful timetable and glacial pace of public school desegregation The Southern Manifesto also provided the Southern Congressional Delegation with the means to stymie federal voting rights legislation so that the dismantling of Jim Crow could be managed largely on white southern terms In the wake of the Brown decision that declared public school segregation unconstitutional seminal events in the early stages of the civil rights movement like the Emmett Till lynching the Montgomery bus boycott and the Autherine Lucy riots at the University of Alabama brought the struggle for black freedom to national attention Orchestrated by United States Senator Richard Brevard Russell Jr of Georgia the Southern Congressional Delegation in general and the United States Senate s Southern Caucus in particular fought vigorously and successfully to counter the initial successes of civil rights workers and maintain Jim Crow The South s defense of white supremacy culminated with this most notorious statement of opposition to desegregation The Southern Manifesto Massive Resistance and the Fight to Preserve Segregation narrates this single worst episode of racial demagoguery in modern American political history and considers the statement s impact upon both the struggle for black freedom and the larger racial dynamics of postwar America

McAndrews, 2014-05-15 Roman Catholics constitute the most populous religious denomination in the United States comprising one in four Americans With the election of John F Kennedy as president in 1960 they attained a political prominence to match their rapidly ascending socioeconomic and cultural profile From Vietnam to Iraq the civil rights movement to federal funding for faith based initiatives and from birth control to abortion Catholics have won at least as often as they have lost What They Wished For by Lawrence J McAndrews traces the role of American Catholics in presidential policies and politics from 1960 until 2004 Though divided by race class gender and party Catholics have influenced issues of war and peace social justice and life and death among modern presidents in a profound way starting with the election of President Kennedy and expanding their influence through the intervening years with subsequent presidents McAndrews shows that American Catholics led by their bishops and in some cases their pope have been remarkably successful in shaping the political dialogue and at helping to effect policy outcomes inside and outside of Washington Indeed although they opened this era by helping to elect one of their own Catholic voters have gained so much influence and have become so secure in their socioeconomic status and so confident in their political standing that they closed the era by rejecting one of their own voting for George W Bush over John Kerry in 2004 The Friction Project Robert I. **France** Charles Coulston Gillispie, 2014-10-20 From the 1770s through the 1820s the French scientific community predominated in the world to a degree that no other scientific establishment did in any period prior to the Second World War In his classic Science and Polity in France The End of the Old Regime Charles Gillispie analyzed the cultural political and technical factors that encouraged scientific productivity on the eve of the Revolution In the present monumental and elegantly written sequel to that work which Princeton is reissuing concurrently he examines how the revolutionary and Napoleonic context contributed to modernization both of politics and science In politics argues Gillispie the central feature of this modernization was conversion of subjects of a monarchy into citizens of a republic in direct contact with a state enormously augmented in power To the scientific community attainment of professional status was what citizenship was to all Frenchmen in the republic proper namely the license to self governance and dignity within the respective contexts Revolutionary circumstances set up a resonance between politics and science since practitioners of both were future oriented in their outlook and scornful of the past Among the creations of the First French Republic were institutions providing the earliest higher education in science From them emerged rigorously trained people who constituted the founding generation in the disciplines of mathematical physics positivistic biology and clinical medicine That scientists were able to achieve their ends was owing to the expertise they provided the revolutionary and imperial authorities in education medicine warfare empire building and industrial technology *Constructing Black Education at Oberlin College* Roland M.

Baumann, 2014-07-31 In 1835 Oberlin became the first institute of higher education to make a cause of racial egalitarianism when it decided to educate students irrespective of color Yet the visionary college's implementation of this admissions policy was uneven In *Constructing Black Education at Oberlin College A Documentary History* Roland M Baumann presents a

comprehensive documentary history of the education of African American students at Oberlin College Following the Reconstruction era Oberlin College mirrored the rest of society as it reduced its commitment to black students by treating them as less than equals of their white counterparts By the middle of the twentieth century black and white student activists partially reclaimed the Oberlin legacy by refusing to be defined by race Generations of Oberlin students plus a minority of faculty and staff rekindled the college's commitment to racial equality by 1970 In time black separatism in its many forms replaced the integrationist ethic on campus as African Americans sought to chart their own destiny and advance curricular change Oberlin's is not a story of unbroken progress but rather of irony of contradictions and integrity of myth and reality and of imperfections Baumann takes readers directly to the original sources by including thirty complete documents from the Oberlin College Archives This richly illustrated volume is an important contribution to the college's 175th anniversary celebration of its distinguished history for it convincingly documents how Oberlin wrestled over the meaning of race and the destiny of black people in American society *Ecological Restoration Law* Afshin Akhtar-Khavari, Benjamin J. Richardson, 2019-01-25

Harwell, 2014-08-05

As tensions mounted before Freedom Summer one organization tackled the divide by opening lines of communication at the request of local women Wednesdays in Mississippi WIMS Employing an unusual and deliberately feminine approach WIMS brought interracial interfaith teams of northern middle aged middle and upper class women to Mississippi to meet with their southern counterparts Sponsored by the National Council of Negro Women NCNW WIMS operated on the belief that the northern participants gender age and class would serve as an entrance to southerners who had dismissed other civil rights activists as radicals The WIMS teams respectable appearance and quiet approach enabled them to build understanding across race region and religion where other overtures had failed The only civil rights program created for women by women as part of a national organization WIMS offers a new paradigm through which to study civil rights activism challenging the stereotype of Freedom Summer activists as young student radicals and demonstrating the effectiveness of the subtle approach taken by proper ladies The book delves into the motivations for women's civil rights activism and the role religion played in influencing supporters and opponents of the civil rights movement Lastly it confirms that the NCNW actively worked for
