BURGLARY POLICY & PROCEDURES — for use by company personnel after a burglary. [TEMPLATE – Items in blue should not be included in final policy]

This document is intended to provide management with information on developing a written burglary policy. This information should not be considered an legal advice or legal opinion on specific facts. This is not intended as definitive statement on the subject but is only providing positive information for the reader. Users should consult with their own counsel/counselors before implementing any of the suggested policies/procedural contained in this document.

FACT: Technically, burglary is the unlawful entering into any property with intent to commit a crime. No forced entry is required to meet the definition of burglary. No property has to be removed. However, most often we think of burglary as a forced entry in order to commit theft.

FACT: Pharmacies have always been an attractive target for burglars!

FACT: Burglaries against pharmacies are increasing at an alarming rate.

FACT: Preventing burglaries is difficult, but not impossible. The object is to make the pharmacy less attractive to a potential thief or help/they move along to an easier target.

MAKING THE STORE A LESS ATTRACTIVE TARGET

- Arrange our stock shelves so that the most targeted drugs are not visible from the street door.
- Rearrange our stock shelves periodically so that the most targeted drugs are not always in the same location.
- Pharmacy personnel should not discuss these inventory controls to even other store personnel that don't have a "need to know", and certainly not within earshot of customers.
- Install a surveillance system. Make the cameras or camera housings obvious. Even "dummy" cameras can be effective deterrents. Hide and make secure the recording devices.
- Install an alarm system connected to the local law enforcement center or to a Central Station Alarm company. (See Alarm System White Paper on Risk Management section of www.abcc.com)
- Place any controls or circuit panels for the alarm or surveillance systems away from areas that can be accessed by the public, such as restrooms or the counter leading to a back exit.
- Place signs and placards such as "Protected by ABC Alarm Systems" conspicuously throughout the store and on exterior doors (These will normally be available from your alarm system vendor).
- Analyze our operations and facilities' most likely points of entry. Include less well-protected neighboring properties that could be used as a staging area to enter our property. We will consider using bolted up deadbolt locks; tamper resistant door bars, metal, or metal clad doors; changing to shatterproof glass or plexiglass; bars over windows; and/or metal security "grates" or "curtains".
