

A visit to the zoo

Today our class teacher took us to the zoo. We went to the zoo by bus. We were about twenty students on the bus. We entered the zoo through a large gate. Our teacher guided us. We saw a lion inside a cage. We also saw tigers, giraffes and other wild animals in a fenced area. The best experience was seeing the roar of the big Lion face to face. Snake park was also a part of the zoo. It was a thrilling experience watching the snakes move just like that behind the glass panes. We came back to school at 3 PM. It was a place worth to spend time with family or big groups.

Making Sense of Narrative Text Michael Toolan, 2016-06-03 This book takes the following question as its starting point What are some of the crucial things the reader must do in order to make sense of a literary narrative The book is a study of the texture of narrative fiction using stylistics corpus linguistic principles especially Hoey s work on lexical patterning narratological ideas and cognitive stylistic work by Werth Emmott and others Michael Toolan explores the textual grammatical nature of fictional narratives critically re examining foundational ideas about the role of lexical patterning in narrative texts and also engages the cognitive or psychological processes at play in literary reading The study grows out of the theoretical questions that stylistic analyses of extended fictional texts raise concerning the nature of narrative comprehension and the reader s experience in the course of reading narratives and particularly concerning the role of language in that comprehension and experience The ideas of situation repetition and picturing are all central to the book s argument about how readers process story and Toolan also considers the ethical and emotional involvement of the reader developing hypotheses about the text linguistic characteristics of the most ethically and emotionally involving portions of the stories examined This book makes an important contribution to the study of narrative

Graesser, 2013-11-11 When individuals read or listen to prose they try to understand what it means This is quite obvious However the cognitive mechanisms that participate in prose comprehension are far from obvious Even simple stories involve complexities that have stymied many cognitive scientists Why is prose comprehension so difficult to study Perhaps because comprehension is guided by so many domains of knowledge Perhaps because some critical mysteries of prose comprehension reside between the lines in the mind of the comprehender Ten years ago very few psychologists were willing to dig beyond the surface of explicit code in their studies of discourse processing Tacit knowledge world knowledge inferences and expectations were slippery notions that experimental psychologists managed to circumvent rather than understand In many

scientific circles it was taboo to investigate mechanisms and phenomena that are not directly governed by the physical stimulus Fortunately times have changed Cognitive scientists are now vigorously exploring the puzzles of comprehension that lie beyond the word The study of discourse processing is currently growing at a frenetic pace *Literacy Assessment and Intervention for Classroom Teachers* Beverly A. Britton, John B. Black, 2017-11-01 Originally published in 1985 the various chapters in this volume give examples of research on all three aspects of text understanding namely structure world knowledge and process More than this however the research described represents a shift in emphasis from studying stories which dominated the field in the late 1970s to studying expository text This focus on stories was probably due to the essential first step in any science of examining the simplest materials possible However the editors thought that it was time to shift the research focus from stories to expository text and this volume is their attempt to provide this transition **Trial Stories in Jewish Antiquity** Chaya T.

Halberstam, 2024-07-12 What can early Jewish courtroom narratives tell us about the capacity and limits of human justice By exploring how judges and the act of judging are depicted in these narratives *Trial Stories in Jewish Antiquity* Counternarratives of Justice challenges the prevailing notion both then and now of the ideal impartial judge As a work of intellectual history the book also contributes to contemporary debates about the role of legal decision making in shaping a just society Chaya T Halberstam shows that instead of modelling a system in which lofty inaccessible judges follow objective and rational rules ancient Jewish trial narratives depict a legal practice dependent upon the individual judge s personal relationships reactive emotions and impulse to care Drawing from affect theory and feminist legal thought Halberstam offers

original readings of some of the most famous trials in ancient Jewish writings alongside minor case stories in Josephus and rabbinic literature She shows both the consistency of a counter tradition that sees legal practice as contingent upon relationship and emotion and the specific ways in which that perspective was manifest in changing times and contexts
