## Short Essay on Child Labour

Child labour is a social issue where children are compelled to work, depriving them of their childhood and education. It is a violation of their rights and can have severe physical and mental consequences. Child labour is often driven by poverty and the need for extra income in families. The work may be hazardous and affect a child's health and well-being.

Efforts should be made by governments, communities, and individuals to eradicate child labour, ensuring every child gets the opportunity to go to school, play, and grow in a safe environment. Strict laws and their effective implementation are essential to eliminate this menace and secure a better future for our children.
