

Reading Comprehension

Name _____

Date _____

I was counting down the seconds as I watched the clock. I didn't even hear what the teacher was saying. All I knew was I was ready to leave. It was Friday. I heard some chatter in the background, but I didn't listen. All I could think about was how good the food would be that night. I would order a thick juicy hamburger and some fries with extra ketchup. All of the waiters loved me at Jake's Hamburger. Stop. My parents had promised to take me there. Finally, the bell rang. I jumped up and ran to my locker. A lot of papers flew out. I just stuffed them back in, grabbed my things, and ran down the hallway. "Sarah," I heard my teacher call, "Don't forget about," as I ran out of the door. On Monday, I was back at school. "Oh, no, we are having a test," I thought. How could I have known? The teacher handed out the tests. I didn't know any of the answers to the multiplication or division problems.

1. Where was I when I was watching the clock?

2. Where were my parents taking me that night?

3. What was Sarah's teacher probably trying to tell her?

4. Do you think Sarah did well on the test? Why or why not?

5. What class was Sarah probably in when she was watching the clock?

Handbook of Research for Educational Communications and Technology David Jonassen, Marcy Driscoll, 2003-12-08 First Published in 2008 Routledge is an imprint of Taylor Francis an informa company Cognition in Education Matthew T. McCrudden, Danielle S. McNamara, 2017-07-28 There is commonly held belief that some people learn better than others because they are born that way However research indicates that many people who learn better are simply more strategic they use effective strategies and techniques to improve their learning Further these strategies and techniques can be taught to students Thus understanding how we learn enriches our lives and the lives of others Written by leading experts on learning this book situates this topic within the broader context of educational psychology research and brings it to a wider audience With chapters on how the mind works evidence based recommendations about how to enhance learning from both the perspective of students and teachers and clear explanations of key learning concepts and ideas this short volume is designed for any education course that includes learning in the curriculum It is indispensable for pre and in service teachers and student researchers alike
