Intelligent Computing and Information Science Ran Chen, 2010-12-17 This two volume set CCIS 134 and CCIS 135 constitutes the refereed proceedings of the International Conference on Intelligent Computing and Information Science ICICIS2011 held in Chongqing China in January 2011 The 226 revised full papers presented in both volumes CCIS 134 and CCIS 135 were carefully reviewed and selected from over 600 initial submissions The papers provide the reader with a broad overview of the latest advances in the field of intelligent computing and information science Programmable Devices and Systems 2001 W. Ciazynski, W. Ciężysński, Edward Hryniewicz, P. Kłosowski, 2002 Scientific meetings on programmable devices and systems began in 1995 with the PDS 95 event organised by the Institute of Electronics Silesian University of Technology SUT Many papers on the issues of programmable devices and systems were presented at numerous conferences and workshops devoted to electronics and circuit theory yet there were no workshops devoted solely to those particular topics Combined with the belief that some specific common problems appeared in the area of PDS justified the decision to organise the PDS meeting The PDS2001 IFAC Workshop organised by the Institute of Electronics SUT Gliwice Poland was the 5th event in the series The aim of the meeting was to define the future trends of this field via the interaction of industry technical research centres and academia representatives This Proceedings volume contains 54 duly presented papers and many of them when compared to the Preprints volume version have been corrected and enriched with the discussion results The papers are grouped according to the Workshop plenary sessions topics as follows bull Communication bull Digital Signal Processing bull Industrial Programmable Logic Controllers bull Field Programmable Logic *Catalog of Aeronautical and Allied Technical Documents* United States. Army Air Forces. Matériel Command, 1946 Design Bernhard E. Bürdek, 2005-04-08 Design today is a global instrument Bernhard B rdek traces the progress of design from its beginnings in the late 19th century through the most significant movements of the 20th century up to those recent developments in biological engineering which will shape the 21st century Design is now a discipline in its own right and its expertise can be incorporated within interdisciplinary processes The most important fundamental principles of design theory and methodology are presented looking in particular at the communicative function of products and highlighting aspects such as corporate and service design design management strategic design interface interaction design and human design *Sensors and Instrumentation, Aircraft/Aerospace and Dynamic Environments Testing, Volume 7* Chad Walber, Matthew Stefanski, Julie Harvie, 2025-08-07 Sensors and Instrumentation Aircraft Aerospace and Energy Harvesting Volume 7 Proceedings of the 40th IMAC A Conference and Exposition on Structural Dynamics 2020 the seventh volume of nine from the Conference brings together contributions to this important area of research and engineering The collection presents early findings and case studies on fundamental and applied aspects of Shock Vibration Aircraft Aerospace Energy Harvesting Dynamic Environments Testing including papers on Alternative Sensing Acquisition Active Controls Instrumentation Aircraft Aerospace Aerospace

Handbook of Emergency Response Adedeji B. Badiru, LeeAnn Racz, 2013-08-22 Despite preemptive preparations disasters can and do occur Whether natural disasters catastrophic accidents or terrorist attacks the risk cannot be completely eliminated A carefully prepared response is your best defense *Handbook of Emergency Response A Human Factors and Systems Engineering Approach* presents practical advice and guidelines on how to plan the coordinated execution of emergency response A useful tool to mitigate logistical problems that often follow disasters or extreme events the core of this guide is the role of human factors in emergency response project management The handbook provides a systematic structure for communication cooperation and coordination It highlights what must be done and when and how to identify the resources required for each effort The book tackles cutting edge research in topics such as evacuation planning chemical agent sensor placement and riverflow prediction It offers strategies for establishing an effective training program for first responders and insightful advice in managing waste associated with disasters Managing a project in the wake of a tragedy is complicated and involves various emotional sentimental reactive and chaotic responses This is the time that a structured communication model is most needed Having a guiding model for emergency response can help put things in proper focus This book provides that model It guides you through planning for and responding to various emergencies and in overcoming the challenges in these tasks **Managing Information Technology Resources in Organizations in the Next Millennium** Information Resources Management Association. International Conference, 1999-01-01 *Managing Information Technology Resources in Organizations in the Next Millennium* contains more than 200 unique perspectives on numerous timely issues of managing information technology in organizations around the world This book featuring the latest research and applied IT practices is a valuable source in support of teaching and research agendas *Model-Reference Robust Tuning of PID Controllers* Victor M. Alfaro, Ramon Vilanova, 2016-04-16 This book presents a unified methodology for the design of PID controllers that encompasses the wide range of different dynamics to be found in industrial processes This is extended to provide a coherent way of dealing with the tuning of PID controllers The particular method at the core of the book is the so called model reference robust tuning MoReRT developed by the authors MoReRT constitutes a novel and powerful way of thinking of a robust design and taking into account the usual design trade offs encountered in any control design problem The book starts by presenting the different two degree of freedom PID control algorithm variations and their conversion relations as well as the indexes used for performance robustness and fragility evaluation the bases of the proposed model Secondly the MoReRT design methodology and normalized controlled process models and controllers used in the design are described in order to facilitate the formulation of the different design problems and subsequent derivation of tuning rules In later chapters the

application of MoReRT to over damped inverse response integrating and unstable processes is described The book ends by presenting three possible extensions of the MoReRT methodology thereby opening the door to new research developments In this way the book serves as a reference and source book for academic researchers who may also consider it as a stimulus for new ideas as well as for industrial practitioners and manufacturers of control systems who will find appropriate advanced solutions to many application problems

Embedded Systems Handbook Richard Zurawski,2018-09-03 Considered a standard industry resource the Embedded Systems Handbook provided researchers and technicians with the authoritative information needed to launch a wealth of diverse applications including those in automotive electronics industrial automated systems and building automation and control Now a new resource is required to report on current developments and provide a technical reference for those looking to move the field forward yet again Divided into two volumes to accommodate this growth the Embedded Systems Handbook Second Edition presents a comprehensive view on this area of computer engineering with a currently appropriate emphasis on developments in networking and applications Those experts directly involved in the creation and evolution of the ideas and technologies presented offer tutorials research surveys and technology overviews that explore cutting edge developments and deployments and identify potential trends This first self contained volume of the handbook Embedded Systems Design and Verification is divided into three sections It begins with a brief introduction to embedded systems design and verification It then provides a comprehensive overview of embedded processors and various aspects of system on chip and FPGA as well as solutions to design challenges The final section explores power aware embedded computing design issues specific to secure embedded systems and web services for embedded devices Those interested in taking their work with embedded systems to the network level should complete their study with the second volume Network Embedded Systems

Reader's Guide to the History of Science Arne Hessenbruch,2013-12-16 The Reader s Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn

procedure from the basic idea and production capabilities through to the real model the conversion from 3D model to 2D manufacturing drawing is also clearly explained Topics covered include modeling of prism axisymmetric symmetric and sophisticated shapes digitization of physical models using modeling software creation of a CAD model starting from a physical model free form surface modeling modeling of product assemblies following bottom up and top down principles and the presentation of a product in accordance with the rules of technical documentation This book which includes more than 500 figures will be ideal for students wishing to gain a sound grasp of space modeling techniques Academics and professionals will find it to be an excellent teaching and research aid and an easy to use guide

Characterization of Fly Ash for Use in Concrete Turgut Demirel, 1983 Recent construction of new generation power plants burning western coal within Iowa has resulted in fly Ash production on the order of 760 000 tons annually Although fly ash has long been accepted as a valuable replacement for portland cement in concrete most experience has been with fly ash generated from eastern bituminous coals A few years ago fly ash in Iowa was not a significant factor because production was small and economics dictated disposal as the better alternative than construction use Today the economic climate coupled with abundance of the material makes constructive use in concrete feasible The problem is however fly ash produced from new power plants is different than that for which information was available It seems fly ash types have outgrown existing standards The objective of this study was to develop fundamental information about fly ashes available to construction in Iowa such that its advantages and limitations as replacement to portland cement can be defined Evaluative techniques used in this work involve sophisticated laboratory equipment not readily available to potential fly ash users so a second goal was preliminary development of rapid diagnostic tests founded on fundamental information Lastly Iowa Department of Transportation research indicated an interesting interdependency among coarse aggregate type fly ash and concrete's resistance to freeze thaw action Thus a third charge of this research project was to verify and determine the cause for the phenomena One objective of this project was to determine properties of Iowa fly ashes and evaluate their relevance to use of the material as an admixture of PCC This phase of the research involved two approaches The first involved the development of a rapid method for determining quantitative elemental composition while the second was aimed at both qualitative and quantitative determination of compounds X ray fluorescence techniques were adapted for rapid determination of elemental composition of fly ash The analysis was performed using a Siemens SR 200 sequential x ray spectrometer controlled by a PDP 11 03 microcomputer The spectrometer was equipped with a ten sample specimen chamber and four interchangeable analyzing crystals Unfiltered excitation radiation was generated using a chromium tube at 50 KV and 48 ma Programs for the spectrometer were developed by the Siemens Corporation

Computer Security Sokratis Katsikas, Frédéric Cuppens, Nora Cuppens, Costas Lambrinoudakis, Christos Kalloniatis, John Mylopoulos, Annie Antón, Stefanos Gritzalis, Weizhi Meng, Steven Furnell, 2020-12-16 This book constitutes the refereed post conference proceedings of the 6th International Workshop on

Security of Industrial Control Systems and Cyber Physical Systems CyberICPS 2020 the Second International Workshop on Security and Privacy Requirements Engineering SECPRE 2020 and the Third International Workshop on Attacks and Defenses for Internet of Things ADIoT 2020 held in Guildford UK in September 2020 in conjunction with the 25th European Symposium on Research in Computer Security ESORICS 2020 Due to COVID 19 pandemic the conference was held virtually The CyberICPS Workshop received 21 submissions from which 5 full papers were selected for presentation They cover topics related to threats vulnerabilities and risks that cyber physical systems and industrial control systems face cyberattacks that may be launched against such systems and ways of detecting and responding to such attacks From the SECPRE Workshop 4 full papers out of 7 submissions are included The selected papers deal with aspects of security and privacy requirements assurance and evaluation and security requirements elicitation and modelling and to GDPR compliance From the ADIoT Workshop 2 full papers and 2 short papers out of 12 submissions are included The papers focus on IoT attacks and defenses and discuss either practical or theoretical solutions to identify IoT vulnerabilities and IoT security mechanisms
