Product Overview

Model OOH941 is an advanced, flexible multi-criteria fire detector that incorporates a redundant optical / thermal sensor. Additionally, Model OOH941 uses a distinctive forward / backward, light-scattering technology that provides state-of-the-art, unparalleled fire detection to the widest range of fire types.

Each Model OOH941 is programmed as a high-sensitivity detector, thus meeting the requirements of NFPA 76 Standard (for the Fire Protection of Telecommunications Facilities) as a Very Early Warning Fire Detector (VEWFD).

Each of these multi-purpose, addressable detectors offers a full and modern solution to meet the detection needs for commercial facilities. Model OOH941 detectors can be field programmed for simultaneous and / or independent functionality, depending upon the precise customer and application requirements.
For example, the detector can simultaneously utilize the optical and heat sensors for enhanced multi-criteria fire detection, as well as provide independent outputs for heat detection. Any combination of the sensors is possible.

The detector is very versatile, and meets the following fire-industry standards:

- Multi-criteria fire detector (&UL 268)
- Heat detector (&UL 521) with five (5) possible field-selectable temperatures; combined with four (4) rate-of-rise options;
- Direct, in-duct (plenum) detector (&UL 268A)
- Supervisory monitoring for temperature ranges
- NFPA 76 (Telco Standard) as VEWFD
- Low-temperature warning signal at 40°F (4.4°C)
    - for sprinkler systems, per NFPA 25 / NFPA 72

Model OOH941 provides extremely accurate and reliable fire detection with built-in redundancy. It uses advanced, multi-criteria detection technology known as **ASA** (Advanced Signal Analysis), allowing the detector to distinguish non-threatening deceptive phenomena.

For instance, the signals from the detector's sensors are monitored and processed via the **ASA**-patented algorithm technology, which combines the signals into a neural network to create an intelligent, multi-criteria addressable detector.
