

## 4. Adjust the size of the projected image.

- (1) Loosen the arm unit's two fixing screws (B).
- (2) Holding the slide arm's cap, move forward or backward to project the image over the entire screen.
  - When installed following the instructions under "Projection Distance and Screen Size", the image is projected at about the center.
  - The slide arm moves a maximum of 422 mm.
  - In consideration of change over time of the position to which the projected image is adjusted, set so that the projected image is slightly (about 20 mm) smaller than the screen.

### WARNING

- Do not remove the safety lock screws other than for assembly. Doing so could cause the slide arm to come off and fall, resulting in injury.
