social psychology and gender studies The material also includes reviews of relevant research in science education and summaries of empirical data concerning student choices in STEM disciplines in five European countries Featuring both quantitative and qualitative analyses the book makes a substantial contribution to the developing theoretical agenda in STEM education It augments available empirical data and identifies strategies in policy making that could lead to improved participation and gender balance in STEM disciplines The majority of the chapter authors are IRIS project members with additional chapters written by specially invited contributors The book provides researchers and policy makers alike with a comprehensive and authoritative exploration of the core issues in STEM educational participation

Contemporary Perspectives on Science and Technology in Early Childhood Education Olivia Saracho, Bernard Spodek, 2008-01-01 For decades politicians businessmen and other leaders have been concerned with the quality of education including early childhood education in the United States While more than 50% of the children between the ages of three and five are enrolled in preschool and kindergarten programs in the United States no state federal or national standards exist for science or technology education in preschool or kindergarten programs Knowledge about science and technology is an important requirement for all in contemporary society An increasing number of professions require the use of scientific concepts and technological skills and society as a whole depends on scientific knowledge Scientific and technological knowledge should be a part of every individual's education There are many ways to enhance young children's scientific thinking and problem solving skills as well as their technological abilities The purpose of this volume is to present a critical analysis of reviews of research on science and technology education in early childhood education The first part of the volume includes contributions by leading scholars in science while the second part includes contributions by leading scholars in technology

Empowering Science and Mathematics for Global Competitiveness Yuli Rahmawati, Peter Taylor, 2019-06-07 This conference proceedings focuses on enabling science and mathematics practitioners and citizens to respond to the pressing challenges of global competitiveness and sustainable development by transforming research and teaching of science and mathematics The proceedings consist of 82 papers presented at the Science and Mathematics International Conference SMIC 2018 organised by the Faculty of Mathematics and Natural Sciences Universitas Negeri Jakarta Indonesia The proceedings are organised in four parts Science Science Education Mathematics and Mathematics Education The papers contribute to our understanding of important contemporary issues in science especially nanotechnology materials and environmental science science education in particular environmental sustainability STEM and STEAM education 21st century skills technology education and green chemistry and mathematics and its application in statistics computer science and mathematics education
