### Engaging with Educational Change

Alma Fleet, Katey De Gioia, Catherine Patterson, 2016-06-16 Including narratives of practice across diverse Australian settings Engaging with Educational Change fills a gap in the current educational change literature Building on the experience of the authors and their colleagues this book illustrates the power of practitioner inquiry to facilitate positive practice improving change and suggests how others might use this methodology to extend current thinking and evaluation The book includes the voices of practitioners and academics working with a diverse range of age groups and settings across public and private educational contexts including primary schools preschools and childcare centres This multi perspective real research helps inform and inspire people from a range of backgrounds and expertise who want to facilitate practitioner inquiry initiatives themselves The book begins by introducing practitioner inquiry exploring the principles of inquiry based practice and issues of data

alongside the landscapes of educational change Chapters in part two then offer real life case studies highlighting experiences of using practitioner inquiry or supporting those working with these methods to improve educational practice and ultimately the outcomes for children The chapters include case studies of pedagogical leadership and the exploration of issues related to sustaining educational change The final section concludes the book by critically reflecting upon practitioner inquiry and providing guidance for those interested in this change methodology Investigating issues that arise during implementation of practitioner inquiry initiatives Engaging with Educational Change provides both critique and assistance for students and practitioners applying the process in their own settings

Diversity in Mathematics Education Alan Bishop, Hazel Tan, Tasos N Barkatsas, 2014-09-20 This book presents a research focus on diversity and inclusivity in mathematics education The challenge of diversity largely in terms of student profiles or contextual features is endemic in mathematics education and is often argued to require differentiation as a response Typically different curricula text materials task structures or pedagogies are favoured responses but huge differences in achievement still result If we in mathematics education seek to challenge that status quo more research must be focussed not just on diversity but also on the inclusivity of practices in mathematics education The book is written by a group of experienced collaborating researchers who share this focus It is written for researchers research students teachers and in service professionals who recognise both the challenges but also the opportunities of creating and evaluating new inclusive approaches to curriculum and pedagogy ones that take for granted the positive values of diversity Several chapters report new research in this direction The authors are part of or have visited with the mathematics education staff of the Faculty of Education at Monash University in Melbourne Australia The chapters all focus on the ideas of development in both research and practice recognising that the current need is for new inclusive approaches The studies presented are set in different contexts including Australia China the United States and Singapore
