Skinner, 2017-03-01 In *The Beginner's Guide to the Financial Universe* financial astrologer Christeen Skinner takes a step by step approach to understanding how the events in the solar system affect market movements. Starting with the sunspot cycle and moving on to seasonality charts and lunar trading she presents information in an easy to read style. As viewed from Earth the planets each have periods when they appear to be retrograde i.e. moving backward relative to Earth. These periods and their correlation with market activity are considered along with the role Mars plays as it moves through each sign of the zodiac. The phases of a recognized 20 year business cycle, the exact period between one conjunction of Jupiter and Saturn and the next are also explored. The concluding chapter offers date, time and place data that can be used for further investigation.
