Korner,2020-11-11 In this volume Ralph Korner argues that John s extensive social identification with Judaism s Jewishness and Jewish institutions does not reflect a literary program of replacing Israel with the ekklesiai churches assemblies that is the Jewish and non Jewish followers of Jesus as Israel s Messiah Rather John is emplacing his Christ followers further within Israel without thereby superseding Israel as a national identity for ethnic Jews who do not follow Jesus as the Christos There are three primary roads travelled in this investigative journey First Korner explores ways in which a Jewish heritage is intrinsic to the literary structure genre eschatology symbolism and theological motifs of the Apocalypse Second he challenges the linear chronology of generally supersessionist dispensational readings of Revelation s visionary content by arguing for a reiterative repetitive structure based on certain literary devices that also provide structure for visions within Jewish apocalypses and Hebrew prophecies Third he incorporates the most recent research on ekklesia usage especially in Asia Minor to assess how John s ekklesia associations might have been non supersessionally perceived especially by Jews in Roman Asia **Conway and Coolidge's Climbers' Guides** ,1893 *Neotropical Birds of Prey* David Whitacre,2013-05-15 Until recently surprisingly little has been known about the biology and behavior of tropical forest raptors including such basic aspects as diets breeding biology habitat requirements and population ecology information critical to the development of conservation efforts The Peregrine Fund conducted a significant eight year long research program on the raptor species including owls in Tikal National Park in Guatemala to learn more about Neotropical birds of prey Impressive and unprecedented in scale this pioneering research also involved the development of new methods for detecting enumerating and studying these magnificent but often elusive birds in their forest home Beautifully illustrated with photographs of previously little known species the resulting book is the most important single source for information on the lowland tropical forest raptor species found in Central America Neotropical Birds of Prey covers twenty specific species in depth including the Ornate Hawk Eagle the Barred Forest Falcon the Bat Falcon and the Mexican Wood Owl offering thorough synopses of all current knowledge regarding breeding biology and behavior diet habitat use and spatial needs Contributors to this landmark work also show how the populations fit together as a community with overlapping habitat and prey needs that can put them in competition with reptiles and mammalian carnivores as well yet differ from one another in their nesting or feeding behaviors and population dynamics The work s substantive original data offer interesting comparisons between tropical and
