### What NetMeeting does?

NetMeeting is an easy to use software, that allows the user to communicate with one or more distant on line users. It supports sound, images, chat and software exchange.

### Where do I find NetMeeting?

Regardless which personal settings you have in your computer, NetMeeting starts if you click on its image, which you can find in:

**Start / Programs / Accessories / Communications / Microsoft NetMeeting.**

### What happens when we first use NetMeeting?

NetMeeting, asks for user personal details, such as name, last name, email, country. Modem's speed is also requested. NetMeeting traces if there is sound card and microphones and provides a brief test that will set the desirable volume. It also traces if there is a camera connected on the computer, so that pictures will be transmitted. There again a short test is provided, so that best settings will be achieved.

The whole procedure takes place through a wizard, which provides the user with small interactive windows in the screen: the user has to push the "next" button, if he agrees with the settings suggested. *Settings cannot be altered.* An example of the wizard here follows:
