Expressive Networks Matthew Kilbane, 2025-06-10 Expressive Networks convenes an urgent conversation on digital media and the social life of contemporary poetry Tracing how poems circulate through online spaces and how capitalized platforms have come to pattern the reading and writing of poetry contributors emphasize both the expressivist cast of digital literary culture and the deep running ambivalence that characterizes aesthetic and critical responses to platformed cultural production The volume features chapters on Pan African spoken word programs Singaporean Facebook groups decolonial hemispheric networks and Japanese media critical poetries as well as platforms such as Twitter X Instagram and Amazon Though contributors write from a variety of methodological positions and address themselves to a range of archives they share the primary conviction that the impact of Web 2.0 on literary practice is far reaching far from self evident and far more variegated and unpredictable than easy summations of social media's influence suggest Expressive Networks asks after poetry's present and future by examining what poems themselves express about the social make up of networked platforms Edited by Matthew Kilbane with contributions from Cameron Awkward Rich Micah Bateman Andrew Campana Sumita Chakraborty Scott Challener C. Networks and Religion Sean F. Everton, 2018-07-12. Social scientists who study religion generally believe that social networks play a central role in religious life. However, most studies draw on measures that are relatively poor proxies for capturing the effects of social networks. This book illustrates how researchers can draw on formal social network analysis methods to explore the interplay of networks and religion. The book's introductory chapters provide overviews of the social scientific study of religion and social network analysis. The remaining chapters explore a variety of topics current in the social scientific study of religion as well as introducing a variety of social network theories and methods such as balance theory, ego network analysis, exponential random graph models and stochastic actor oriented models. By embedding social network analysis within a social scientific study of religion framework, *Networks and Religion* offers an array of approaches for studying the role that social networks play in religious belief and practice.
