*Neuroscience and Art* Amy Ione, 2024-08-27 This book is focused on how understanding ourselves as humans is incomplete without considering both biological and cultural aspects Using the neurocultural perspective the book explores how everything in the world is filtered back and forth through the brain and culture The thrust of the book therefore is to explore the power of art in creating a bridge between cultural and neuroscientific lines of inquiry Looking at both clinical and non clinical populations the text examines historical foundations distinguishes congenital developmental conditions from those that are acquired and emphasizes how the brain constructs our sensory experiences Several distinctive features separate this research from other publications First the book opens with a review of how the historical literature is still etched into the ideas we employ to explain elements across the interdisciplinary fields of art aesthetics our sensory experience psychology cognition and well being Second the research adopts a humanistic rather than a philosophical or social science perspective in demonstrating the value of coupling anatomy and physiology with the natural and social environment In this artists from all genres are

incorporated Among them are Iris Murdoch Ludwig van Beethoven Leonardo da Vinci Cristoforo de Predis Rembrandt Federico Fellini Chuck Close and David Hockney Case studies demonstrate how neuroscientific research meshes with art individual and cultural variables in ways that range from health and well being to physiological decline and biological traumas These include a case study that examines how Oliver Sacks combined biology and biography in his writings It also explores art projects in several genres inspired by his studies Another case study is on the role of film as a useful clinical tool Here the book also demonstrates that cinematic devices used by filmmakers intersect with perceptual and cognitive neuroscience A defining feature of the analysis is the integration of research on brain injuries with humanistic responses in film literature and the visual arts This section outlines the lack of consensus regarding the causes and treatment of shell shock in World War I before introducing how research and art now work with PTSD TBI Finally the book examines therapeutic cases of professional and non professional artists concluding with a discussion of synesthesia and the senses

Cinema, MD Eelco F. M. Wijdicks, 2020 Cinema MD follows the intersection of medicine and film and how filmmakers wrote a history of medicine over time analyzing not only changing practices changing morals and changing expectations but also medical stereotypes medical activism and violations of patients integrity and autonomy Examining over 400 films with medical themes over a century of cinema this book establishes the cultural medical and historical importance of the art form
