**Informing with the Case Method** T. Grandon Gill,2011 There are a number of marvelous books that address the topic of the case method If you are interested in facilitating cases you can look to the classic book Teaching and the Case Method by Louis Barnes C Roland Christensen and Abby Hansen 1994 The collection of essays on the subject Education for Judgment The Artistry of Discussion Leadership by C Roland Christensen David Garvin and Ann Sweet

1991 is a wonderful and inspiring read as well. If your interest is case based research it would be nearly impossible to find a more authoritative source than Robert Yin's 2009 4th Edition Case Study Research Design and Methods which at last count has been cited nearly 29 000 times according to Google Scholar. There is even a new entry to the field William Ellet's 2007 The Case Study Handbook How to Read Discuss and Write Persuasively about Cases that is specifically aimed at the student. At first glance then the topic of case studies in education and research seems to be pretty well covered. Do we really need another book on the subject? I write this book believing the answer is yes. While I have great affection for the classics there are a number of issues facing most business faculty not to mention faculty members from disciplines outside of business that these books simply do not address. In writing this book my intention is to offer some thoughts on some of these. Paradoxically these omissions arise from the very fact that the authors of the classics are undisputed masters of their craft. Why this is a problem should become clear as I identify the three areas of focus for this book. The first issue that I feel must be considered is using the case method with a novice audience. Consider the following. When I was enrolled in the MBA program at Harvard Business School HBS in the early 1980s the curriculum consisted of nearly 900 case discussion 15 per week and perhaps as many as 20 class periods given over to lecture style presentations. When I teach a case method graduate course at my own institution on the other hand I am constrained to 11 case discussions a 12 week semester. As it happens I am also the only course in the entire program that employs pedagogy reasonably faithful to the case method as it is normally defined. The math is very simple. By the last day of my semester my students have as much experience discussing cases as I did on Thursday afternoon of the first week of my two year MBA program at HBS. With the exception of faculty teaching at those rare institutions that have chosen to widely adopt the case method the situation I face is commonplace. The second concern that existing books raise for me is their tendency to focus on isolated topics. Specifically case facilitation case writing and case research are treated as separable activities. I would argue that these three aspects of the case method which I define quite broadly are inseparable. For institutions that wish to achieve the full set of benefits provided by the case method all three activities must be pursued in parallel. Perhaps this is why so few institutions have achieved success through the case method. In this book I will argue that achieving such integration is precisely why those rare institutions have been so successful. Once you start believing that the case method can be a key to institutional success how you get there becomes a real challenge. At leading institutions featuring the case method such as HBS the philosophy is largely learned through a period of apprenticeship. For example I did not encounter any of the references mentioned in the first paragraph excepting Yin at any time during my 5 year doctorate at HBS. Instead I went out and wrote cases facilitated discussions and did research under the guidance of faculty members who were masters of the craft. How can someone without the benefit of such an experience acquire such mastery? While I cannot offer any promises in this regard I will at least provide some examples and easy to follow checklists that may be of service to individuals getting started.
