Rena Tarbet Training:

Strategic Management and Business Policy Thomas L. Wheelen, 1986 **Cases in Strategic Management** Glenn Boseman, Arvind Phatak, 1988-01-18 This text is intended to teach the concepts and techniques of strategic management while simultaneously introducing an approach to identifying strategic issues and problems within organizations. It opens by presenting a general framework for case analysis which shows how to use strategic management concepts during the analytical process. This is followed by a case on Overseas National Airways and an analysis illustrating how the suggested framework has been applied. The body of the text offers a rich assortment of current cases balanced between service and manufacturing organizations and ranging from the simple to those requiring more complex analysis. The cases selected here also represent a variety of industry conditions from incipient to mature industries.

The General Manager and Strategy Formulation John E. Dittrich, 1988-03-03 Provides the framework, content, and materials for the development of knowledge and skills needed to be an effective general manager. Material deals with the important tasks of implementing strategy through intrafunction integration and provides an opportunity to relate functional area knowledge to the central role of general manager. Not merely a text and cases book, the text is designed to aid both instructor and student. The organization of materials is deliberately designed to follow the hierarchy of educational objectives of Bloom's Taxonomy. This method encourages the development of internally derived analytic frameworks as a means of dealing with multi-dimensional unstructured situations which the student will inevitably face and will help the future manager formulate and implement sound and effective organizational strategies.
