Mega General Knowledge Quiz V. V.K Subburaj,2004-08 *The Flickering Mind* Todd Oppenheimer,2004-12-07 The Flickering Mind by National Magazine Award winner Todd Oppenheimer is a landmark account of the failure of technology to improve our schools and a call for renewed emphasis on what really works American education faces an unusual moment of crisis For decades our schools have been beaten down by a series of curriculum fads empty crusades for reform and stingy funding Now education and political leaders have offered their biggest and most expensive promise ever the miracle of computers and the Internet at a cost of approximately 70 billion just during the decade of the 1990s Computer technology has become so prevalent that it is transforming nearly every corner of the academic world from our efforts to close the gap between rich and poor to our hopes for school reform to our basic methods of developing the human imagination Technology is also recasting the relationships that schools strike with the business community changing public beliefs about the demands of tomorrow's working world and reframing the nation's systems for researching testing and evaluating achievement All this change has led to a culture of the flickering mind and a generation teetering between two possible futures In one youngsters have a chance to become confident masters of the tools of their day to better address the problems of tomorrow Alternatively they can become victims of commercial novelties and narrow measures of ability underscored by misplaced faith in standardized testing At this point America's students can't even make a fair choice They are an increasingly distracted lot Their ability to reason to listen to feel empathy is quite literally flickering Computers and their attendant technologies did not

cause all these problems but they are quietly accelerating them In this authoritative and impassioned account of the state of education in America Todd Oppenheimer shows why it does not have to be this way Oppenheimer visited dozens of schools nationwide public and private urban and rural to present the compelling tales that frame this book He consulted with experts read volumes of studies and came to strong and persuasive conclusions that the essentials of learning have been gradually forgotten and that they matter much more than the novelties of technology He argues that every time we computerize a science class or shut down a music program to pay for new hardware we lose sight of what our priority should be enlightened basics Broad in scope and investigative in treatment *The Flickering Mind* will not only contribute to a vital public conversation about what our schools can and should be it will define the debate Learning and Leading with Technology ,2006
