Everyday Lifestyles and Sustainability Fabricio Chicca, Brenda Vale, Robert Vale, 2018-04-09 The impact of humanity on the earth overshoots the earth's bio capacity to supply humanity's needs meaning that people are living off earth's capital rather than its income However not all countries are equal and this book explores why apparently similar patterns of daily living can lead to larger and smaller environmental impacts The contributors describe daily life in many different places in the world and then calculate the environmental impact of these ways of living from the perspective of ecological and carbon footprints This leads to comparison and discussion of what living within the limits of the planet might mean Current footprints for countries are derived from national statistics and these hide the variety of impacts made by individual people and the choices they make in their daily lives This book takes a bottom up approach by calculating the footprints of daily living The purpose is to show that small changes in behaviour now could avoid some very challenging problems in the future Offering a global perspective on the question of sustainable living this book will be of great interest to anyone with a concern for the future as well as students and researchers in environmental studies human geography and development studies

adaptation and possible rejection of those hypotheses Operational Strategy is based on an in depth understanding of customer preferences and anticipating the choices they make Those choices rather than managers ambitions determine whether a strategy will generate the aspired financial results The book explains by means of detailed real world cases across industries how to generate validated solutions to any strategic problem such as how to enter successfully into new markets either as an innovator or as a latecomer How to defend one s position against aggressive new entrants Or how to sustain margins when price is the only thing customers seem to care about This remarkable book contains expert advice from accomplished strategic advisors and thought leaders Daniel Deneffe and Herman Vantrappen Fad Free Strategy will be a useful tool for smart business executives at mainstream companies who are disappointed with strategy fads and simplistic solutions based on cherry picked anecdotal evidence from today s hero companies It will also appeal to economics faculty members teaching graduate courses in business strategy who are looking for an economics based strategy textbook that is both rigorous and comprehensive The book s core ideas have been taught successfully in continuing and executive education programs at Harvard University and Hult International Business School

Integral Green Slovenia Darja Piciga,Alexander Schieffer,Ronnie Lessem,2016-06-03 Ronnie Lessem and Alexander Schieffer s Integral Green Society and Economy series has three overarching aims The first is to link together two major movements of our time one philosophical the other practical The philosophical movement is towards what many today are calling an integral age while the practical is the green movement duly aligned with that of sustainable development The second is to blend together elements of nature and community culture and spirituality science and technology politics and economics thus serving to bring about an integral green vision albeit with a focus on business and economics As such the authors transcend the limitations to sustainable development and environmental economics which are overly ecological if not also technological in orientation and exclude social and cultural elements Thirdly this particular volume with Darja Piciga focuses specifically on Slovenia as well as on Europe generally drawing on the particular issues and capacities that this country and continent represents particularly for sustainable development and social knowledge based economy The emphasis on Slovenia arose not only because it lies at the heart of Europe but because a specific movement for an Integral Green Slovenian Society and Economy has been co evolved there by the three editors in conjunction with Slovene organisations communities and movements with a view to integrating existing and emerging knowledge resources initiatives and practices into a model as an alternative to austerity for Slovenia and other European countries
