is almost universal and its effect on landscapes cityscapes cultures indeed on the very fabric of the modern world is profound
Cars have brought benefits to individuals in terms of mobility and expanded horizons but the cost has been very high in terms
of damage to the environment and the consumption of precious resources Despite the growing belief that a Faustian price is
now being paid for the freedom cars have bestowed on us we are none the less manufacturing them in ever greater numbers
Autopia is the first book to explore the culture of the motor car in the widest possible sense Featuring newly commissioned
essays by writers critics historians artists and film makers as well as reprinting key texts it examines the effect of the car
throughout the world including the USA Western and Eastern Europe Japan China Cuba India and South Africa In this book
the car is treated neither as a technological fetish object nor as an instrument of danger Instead it is examined as a hugely
important determinant of 20th century culture neither wholly good nor an unmitigated disaster and certainly endlessly
