Nedo Report Faster Building For Industry:

The New Engineering Contract Arthur McInnis, 2001 The introduction of the New Engineering Contract NEC encourages a systematic approach to contracting which is multidisciplinary in nature and fully interlocked in form The NEC is intended by its supporters to be more flexible and easier to use than any current leading traditional standard forms of contract It is believed that these features reduce adversariality and disputes The NEC seeks to achieve this aim primarily through co operative management techniques and incentives built into the NEC s procedures This commentary analyses and evaluates these and related claims of innovation The New Engineering Contract A legal commentary examines the background to the NEC its design objectives structure procedures and likely judicial interpretation to determine whether it improves upon the traditional standard forms of contract Special attention is given in the commentary to the development and the significance of the principles underlying preparation of the NEC as well as the arguments in favour of and against them Throughout the detailed commentary upon the NEC clauses comparisons to the traditional forms are also made to highlight unique features and principles of general application The conclusion reached is that the NEC does make a significant contribution to the development of standard forms of contract addresses many of their short comings and offers one of the best models for their future development direction and design The commentary draws upon the body of the project management literature and legal analysis to support its conclusions The New Engineering Contract A legal commentary will be essential reading for lawyers barristers and solicitors as well as engineers and project managers **Construction**

Reports 1944-98 Mike Murray, David Langford, 2008-04-15 It is often said that in order to know where we are going we need to know where we have been For some years the construction industry has been challenged to deliver better performance in terms of value for money timelier construction and defect free building Behind this remodelling of an industry is Government The interest by Government is not new and report after report in the post war period has exhorted the industry to perform better This book documents how Government through influential reports has sought to shape the performance and attitudes of parties to the construction industry It provides a critical review of 12 of the most significant setting these against their political social and economic background and offers a ready reference and critique for researchers of construction management government and economics *Analysis of the British Construction Industry* Patricia M. Hillebrandt, 1984-03-29 This is a critical and descriptive analysis of the UK construction industry based on up to date statistics The emphasis is on the industry as a whole including its associated professions rather than on individual firms or projects Dr Hillebrandt examines the structure and resources of the industry the demands made on it and its responses A concise and comprehensive picture of the industry is given which will enable readers to understand what it does how it works and how it is likely to develop *Building Procurement* Alan Turner, 1997-11-11 This second edition of Building Procurement has been revised to take into account recent developments in procurement such as the Private Finance initiative as well as

some of the recommendations in the Latham Report and its working groups The author sets out the basics of the building process the principal players along with general conventions and background information on building contracts and conditions of appointment for consultants Fourteen case studies based on real projects principally from the author's experience are included to illustrate the progressive nature of procurement in practice Examples of good and bad procurement decisions are given in the studies with a postscript and comment on the reasons for success or failure

The Design Quality Manual Martin Cook, 2008-04-15 Everyone involved in a building project wants to achieve a better building but design quality means different things to clients users architects cost consultants and contractors Negotiating design priorities is an important part of the development process The Design Quality Manual helps give an objective evaluation of the qualitative aspects of design Matrices with five defined levels of quality have been developed that cover the key areas of architecture environmental engineering user comfort conditions whole life costs detail design and user satisfaction These can be scored by a visual survey and professional judgement and then augmented by scientific measurement where possible e.g. temperature lighting and sound levels The resultant scores allow comparisons in terms of overall and specific aspects of building performance and design quality The Manual covers schools hospitals and housing and offers a set of criteria by which to judge a broad range of design values it focuses the design team on the needs of the end user and on the overall building performance

Making Sense of Construction Improvement Stuart Green, 2023-12-15 Making Sense of Construction Improvement provides a critical evaluation of the construction improvement debate from the end of the Second World War through to the modern era The book offers unique insights into the way the UK construction sector is continuously shaped and re shaped in accordance with changes in the prevailing political economy This second edition brings the book up to date by including coverage of key trends from 2010 2023 The book has been substantially revised and reworked to include new material relating to the age of austerity and the subsequent period of political uncertainty initiated by the Brexit referendum Changes in the political economy are positioned alongside the rise of the sustainability agenda and the advent of zero carbon Particular attention is paid to the ongoing skills crisis and the over hyped advocacy of modern methods of construction MMC as the latest supposed panacea of industry improvement Coverage includes the Farmer 2016 report Modernise or Die and the Construction Playbook HM Government 2020 However perhaps the most important addition is a focus on the Grenfell Disaster 2017 and the subsequent revelations from the public enquiry Further intermediate milestones include Building a Safer Future Hackitt 2018 and the Construction Sector Deal HM Government 2018 The emerging consensus points towards a systemic failure involving not only the construction sector but

also the entire system of regulation and compliance Tracing the failings back over time and scrutinising the role played by previous generations of policymakers Stuart Green ultimately argues that Grenfell was a disaster entirely foretold The insightful and critical analysis of the industry contained within these pages is essential and timely reading for anyone who wants to understand how the construction sector arrived at where it is today and with that knowledge give further thought to where it might go next

Industrial Policy in Britain 1945-1951 Martin Chick,2002-04-30 This is a detailed archive based study of the economic planning of the Attlee governments in which the author seeks to analyse the interaction between the decisions of central planners and the micro economic effects of these decisions Throughout the book Martin Chick pays particular attention to the level pattern and quality of fixed capital investment At the same time there is a continuous concern with the struggle between politicians economists and industrialists over the mix of pricing mechanisms and administrative orders which were to be used in this period This struggle permeated all discussions over matters such as the organisation of nationalised industries the monopoly structure of nationalised industries the allocation of resources and the promotion of higher productivity The author also asks what impact if any economic planning had on the productivity performance of the UK economy
