Raines, 2013 In the last three decades mediation has been increasingly used in the United States and elsewhere Much has been written about the philosophical underpinnings and ethical dilemmas of mediation as well as its applications both within judicial systems and beyond the limits of these systems However some very basic challenges remain How can entrenched positions strong emotions and cultural differences be dealt with Mediation expertise is truly achieved when a mediator learns to overcome these challenges through experience and intuition To speed up the learning curve of mediation expertise Jean Poitras and Susan Raines have benchmarked the mediation process in Expert Mediators Overcoming Mediation Challenges in Workplace Family and Community Conflicts Tapping the experience and wisdom of over 175 highly qualified mediators from across different realms of the mediation practice e.g. family mediation workplace mediation commercial mediation and across geographic regions e.g. U.S. Australia Europe Israel Canada this book integrates best practices in order to improve the performance of mediators For each proposed strategy this book discusses conditions under which each practice should be used as well as approaches to mitigate risks associated with using each strategy and technique **Learning in Work** Raymond Smith, 2018-04-11 This book explores and progresses the concept of

negotiation as a means of describing and explaining individuals learning in work. It challenges the undertheorised and generic use of the concept in contemporary work learning research where the concept of negotiation is most often deployed as a taken for granted synonym for interaction co participation and collaboration and hence used to unproblematically account for workers learning as engagement in social activity. Through a focus on workers personal practice and based on extensive longitudinal empirical research the book advances a conceptual framework The Three Dimensions of Negotiation to propose a more rigorous and work learning specific understanding of the concept of negotiation. This framework enables workers personal work practices and their contributions to the personal organisational and occupational changes that evidence learning to be viewed as negotiations enacted and managed within contexts that are in turn sets of premeditated and concurrent negotiations that frame the transformations on and from which on going negotiations of learning and practice ensue. The book does not seek to supplant understandings of the rich and valuable concept of negotiation. Rather it seeks to develop and promote a more explicit use of the concept as a socio personal learning concept at the same time as it opens alternative perspectives on its deployment as a metaphor for individual s learning in work.

Numerous activities interspersed throughout the text highlight real world situations helping readers see how the concepts presented can be used in their own work environment or personal life. Each chapter also includes discussion questions and references.
