Arabnia,Geoffrey Fox,Ajay Gupta,Manu Malek,2022-03-15 This book constitutes the proceedings of the 22nd International Conference on Parallel and Distributed Computing Applications and Technologies PDCAT 2021 which took place in Guangzhou China during December 17 19 2021 The 24 full papers and 34 short papers included in this volume were carefully reviewed and selected from 97 submissions The papers are categorized into the following topical sub headings networking and architectures software systems and technologies algorithms and applications and security and privacy **VANET** Sonali P. Botkar,Sachin P. Godse,Parikshit N. Mahalle,Gitanjali R. Shinde,2021-03-17 VANET vehicular ad hoc network is a subgroup of MANET mobile ad hoc network It enables communication among vehicles on the road and between related infrastructures This book addresses the basic elements of VANET along with components involved in the communication with their functionalities and configurations It contains numerous examples case studies technical descriptions scenarios procedures algorithms and protocols and addresses the different services provided by VANET with the help of a scenario showing a network tackling an emergency Features Covers all important concepts of VANET for beginners and different road scenarios in VANET Covers essential communication protocols in VANET Introduces approaches for VANET implementation using simulators Provides a classification of messages and a priority based message forwarding strategy This book is aimed at undergraduates

postgraduates industry researchers and research scholars in information and communications technology *Critical Information Infrastructures* Maitland Hyslop,2007-09-05 Resilience is an increasingly important concept and quality in today s world It is particularly important in the area of Critical Infrastructures It is crucial in the area of Critical Information Infrastructure This is because since the year 2000 man has been dependent on information and telecommunications systems for survival particularly in the Organization for Economic Cooperation and Development OECD countries and because all other Critical Inf structures depend upon to a greater or lesser extent Critical Information 1 2 Infrastructure Until probably the late 1980s it would be fair to say that the defense of individual nation states depended upon a mixture of political will and armed might The fall of the Berlin Wall may have effectively ended the Cold War and with it a bipolar world but it brought globalization and a multipolar digital world in its wake Simply put a number of power vacuums were created and these have yet to be fully filled and settled In this New World many changes were afoot These changes include the increasing irrelevance of nation states in federated structures and the export of democracy on the back of globalization One of the biggest changes though is the use of digital technolo gy by the OECD countries This is on such a scale that these countries have become both dependent upon information technology and as individual 3 states largely irrelevant to the new global electronic economy 1 This adaptation of Maslow s hierarchy of needs is attributed to KPMG **Cyber Tips Guide** Eric Peterson,2023-09-28 In today s hyper connected world staying safe in the digital age is more critical than ever before Navigating the Digital Age Safely is your indispensable guide to mastering the art of cybersecurity and protecting yourself online Inside this comprehensive guide you will discover Essential Cyber Tips Learn practical strategies to safeguard your personal and financial information from cyber threats hackers and online scams Internet Safety Explore the ins and outs of safe web browsing social media etiquette and digital identity protection Mobile Security Discover how to secure your smartphones and tablets preventing data breaches and privacy invasions Home Network Protection Protect your home network against cyberattacks ensuring your smart devices are protected from intrusion Safe Online Interactions Navigate the digital landscape confidently from online dating to socializing and gaming Family Friendly Advice Keep your loved ones safe online with expert guidance on protecting children and seniors in the digital age Cyber Hygiene Develop good cybersecurity habits that will serve you well throughout your digital life With Navigating the Digital Age Safely in your hands you will gain the knowledge and skills needed to defend yourself and your loved ones against cyber threats Whether you are a tech novice or a seasoned digital pro this book is your ultimate companion for a safer online experience Do not wait until it is too late Start your journey to digital safety today **Advanced Computing** Deepak Garg,Kit Wong,Jagannathan Sarangapani,Suneet Kumar Gupta,2021-02-10 This two volume set CCIS 1367 1368 constitutes reviewed and selected papers from the 10th International Advanced Computing Conference IACC 2020 held in December 2020 The 65 full papers and 2 short papers presented in two volumes were thorougly reviewed and selected from 286 submissions The papers are

organized in the following topical sections Application of Artificial Intelligence and Machine Learning in Healthcare Using Natural Language Processing for Solving Text and Language related Applications Using Different Neural Network Architectures for Interesting applications Using AI for Plant and Animal related Applications Applications of Blockchain and IoT Use of Data Science for Building Intelligence Applications Innovations in Advanced Network Systems Advanced Algorithms for Miscellaneous Domains New Approaches in Software Engineering *Information Systems Security* Sushil Jajodia,2005-12-09 This book constitutes the refereed proceedings of the First International Conference on Information Systems Security ICISS 2005 held in Calcutta India in December 2005 The 19 revised papers presented together with 4 invited papers and 5 ongoing project summaries were carefully reviewed and selected from 72 submissions The papers discuss in depth the current state of the research and practice in information systems security and cover the following topics authentication and access control mobile code security key management and cryptographic protocols privacy and anonymity intrusion detection and avoidance security verification database and application security and integrity security in P2P sensor and ad hoc networks secure Web services fault tolerance and recovery methods for security infrastructure threats vulnerabilities and risk management and commercial and industrial security *Defending the Metaverse* Ravi Sheth,Mariya Ouaissa,Mariyam Ouaissa,Edeh Michael Onyema,Chandresh Parekha,2025-06-16 This book is aimed at a diverse audience including students researchers academicians cybersecurity professionals IT managers Metaverse developers business leaders policymakers and tech enthusiasts This book is for everyone from beginners to experts researchers and students It offers insights and tools suitable for people with different levels of knowledge making it accessible to a wide range of readers The book fits alongside other published books by addressing the rapidly evolving intersection of cybersecurity and the Metaverse a niche yet increasingly critical area Unlike traditional cybersecurity books that focus on current internet and IT infrastructures this book uniquely targets the virtual environments of the Metaverse It combines advanced technological insights with practical strategies providing a specialized resource that bridges the gap between conventional cybersecurity literature and the futuristic needs of Metaverse security This positions it as an essential read for those looking to stay ahead in the field of cybersecurity within the context of next generation internet platforms **Reimagining New Approaches in Teacher Professional Development** Vimbi Mahlangu,2018-10-10 Reimagining new approaches in teacher professional development is the focus of this book It looks at different perspectives of teacher professional development Most chapters directly or indirectly present and discuss new approaches in teacher professional development in general The purpose of the book is to inform readers that there are new ways of developing teachers professionally and to equip readers with the skills needed to teach or behave in a professional manner The book aims at providing new knowledge about professional development to academics universities education authorities teachers parents and governing body members The authors have diverse perspectives about the issues or aspects pertaining to teacher professional development *Introduction to*

Network & Cybersecurity Hardik A. Gohel ,2015-10-26 The network is no more trustworthy if it is not secure So this book is taking an integrated approach for network security as well as cybersecurity It is also presenting diagrams and figures so any reader can easily understand complex algorithm design and its related issues towards modern aspects of networking This handbook can be used by any teacher and student as a wealth of examples in brief and illustration of it in very elective way to connect the principles of networks and networking protocols with relevant of cybersecurity issues The book is having 8 chapters with graphcis as well as tables and most attractive part of book is MCQ as well as important topic questions at the end of book Apart from this book also provides summery of all chapters at the end of the book which is helpful to any individual to know what book enclosed This book also gives survey topics which can be given to graduate students for research study It is very interesting study to survey of various attacks and threats of day to day life of cyber access and how to prevent them with security   *Networking Fundamentals* Kaveh Pahlavan,Prashant Krishnamurthy,2009-04-20 Focusing on the physical layer Networking Fundamentals provides essential information on networking technologies that are used in both wired and wireless networks designed for local area networks LANs and wide area networks WANs The book starts with an overview of telecommunications followed by four parts each including several chapters Part I explains the principles of design and analysis of information networks at the lowest layers It concentrates on the characteristics of the transmission media applied transmission and coding and medium access control Parts II and III are devoted to detailed descriptions of important WANs and LANs respectively with Part II describing the wired Ethernet and Internet as well as cellular networks while Part III covers popular wired LANs and wireless LANs WLANs as well as wireless personal area network WPAN technologies Part IV concludes by examining security localization and sensor networking The partitioned structure of the book allows flexibility in teaching the material encouraging the reader to grasp the more simple concepts and to build on these foundations when moving onto more complex information Networking Fundamentals contains numerous illustrations case studies and tables to supplement the text as well as exercises with solutions at the end of each chapter There is also a companion website with password protected solutions manual for instructors along with other useful resources Provides a unique holistic approach covering wireless communication technologies wired technologies and networking One of the first textbooks to integrate all aspects of information networks while placing an emphasis on the physical layer and systems engineering aspects Contains numerous illustrations case studies and tables to supplement the text as well as exercises with solutions at the end of each chapter Companion website with password protected solutions manual and other useful resources   **Cyberspace & Sovereignty** Hongrui Zhao,2022-01-13 How do you describe cyberspace comprehensively This book examines the relationship between cyberspace and sovereignty as understood by jurists and economists The author transforms and abstracts cyberspace from the perspective of science and technology into the subject object platform and activity in the field of philosophy From the three dimensions of ontology cognition of cyberspace and information

epistemology sovereignty evolution and methodology theoretical refinement he uses international law philosophy of science and technology political philosophy cyber security and information entropy to conduct cross disciplinary research on cyberspace and sovereignty to find a scientific and accurate methodology Cyberspace sovereignty is the extension of modern state sovereignty Only by firmly establishing the rule of law of cyberspace sovereignty can we reduce cyber conflicts and cybercrimes oppose cyber hegemony and prevent cyber war The purpose of investigating cyberspace and sovereignty is to plan good laws and good governance This book argues that cyberspace has sovereignty sovereignty governs cyberspace and cyberspace governance depends on comprehensive planning This is a new theory of political philosophy and sovereignty law

Intelligent Systems Design and Applications Ajith Abraham,Aswani Kumar Cherukuri,Patricia Melin,Niketa Gandhi,2019-04-11 This book highlights recent research on Intelligent Systems and Nature Inspired Computing It presents 212 selected papers from the 18th International Conference on Intelligent Systems Design and Applications ISDA 2018 and the 10th World Congress on Nature and Biologically Inspired Computing NaBIC which was held at VIT University India ISDA NaBIC 2018 was a premier conference in the field of Computational Intelligence and brought together researchers engineers and practitioners whose work involved intelligent systems and their applications in industry and the real world Including contributions by authors from over 40 countries the book offers a valuable reference guide for all researchers students and practitioners in the fields of Computer Science and Engineering **Web Communication Technologies and Internet-Related Social Issues - HSI 2003** Chin-Wan Chung,Chong-Kwon Kim,Won Kim,Tok-Wang Ling,Kwan-Ho Song,2003-08-03 The refereed proceedings of the Second International Conference on Human Society Interet HSI 2003 held in Seoul Korea in June 2003 The 57 revised full papers and 31 revised short papers presented were carefully reviewed and selected from 219 submissions The papers are organized in topical sections on Web performance authentication social issues security and document access routing XML Internet applications e business scheduling and resource allocation wireless networks Web components multimedia communications e payment and auctions cyber education mobility and handoff Internet protocols mobile agents and communications **Selected Topics In Communication Networks And Distributed Systems** Sudip Misra,Subhas Chandra Misra,Isaac Woungang,2010-04-30 Communication networks and distributed system technologies are undergoing rapid advancements The last few years have experienced a steep growth in research on different aspects in these areas Even though these areas hold great promise for our future there are several challenges that need to be addressed This review volume discusses important issues in selected emerging and matured topics in communication networks and distributed systems It will be a valuable reference for students instructors researchers engineers and strategists in this field Russian Cyber Operations Scott Jasper,2022-09-01 Russia has deployed cyber operations to interfere in foreign elections launch disinformation campaigns and cripple neighboring states all while maintaining a thin veneer of deniability and avoiding strikes that cross the line into acts of war How should a targeted nation

respond In Russian Cyber Operations Scott Jasper dives into the legal and technical maneuvers of Russian cyber strategies proposing that nations develop solutions for resilience to withstand future attacks Jasper examines the place of cyber operations within Russia s asymmetric arsenal and its use of hybrid and information warfare considering examples from French and US presidential elections and the 2017 NotPetya mock ransomware attack among others A new preface to the paperback edition puts events since 2020 into context Jasper shows that the international effort to counter these operations through sanctions and indictments has done little to alter Moscow s behavior Jasper instead proposes that nations use data correlation technologies in an integrated security platform to establish a more resilient defense Russian Cyber Operations provides a critical framework for determining whether Russian cyber campaigns and incidents rise to the level of armed conflict or operate at a lower level as a component of competition Jasper s work offers the national security community a robust plan of action critical to effectively mounting a durable defense against Russian cyber campaigns
