**Language Testing Around the World** Betty Lantaigne, Christine Coombe, James Dean Brown, 2021-02-17 This book combines insights from language assessment literacy and critical language testing through critical analyses and research about challenges in language assessment around the world. It investigates problematic practices in language testing which are relevant to language test users such as language program directors, testing centers, and language teachers, as well as teachers in training in Graduate Diploma and Master of Arts in Applied Linguistics programs. These issues involve aspects of language testing such as test development, test administration, scoring, and interpretation, use of test results. Chapters in this volume discuss insights about language testing policy, testing world languages, developing program level language tests, and tests of specific language skills and language assessment literacy. In addition, this book identifies two needs in language testing for further examination: the need for collaboration between language test developers, language test users, and language users, and the need to base language tests on real world language use. **Energy Research Abstracts**, 1982

**Individual Differences in Second/Foreign Language Speech Production: Multidisciplinary Approaches and New Sounds** Peijian Paul Sun, Boping Yuan, Xun Yan, Jimin Kahng, 2023-09-01 Second foreign language L2 speech production is a complex process requiring individuals combined efforts to utilize various processing components such as conceptualiser formulator and articulator Since the publication of Pim Levelt's book *Speaking From Intention to Articulation* in 1989 a considerable number of studies have examined L2 speech production in the field of neuroscience with a particular focus on the link between speech perception and speech production Undeniably a neurolinguistic examination of speech production can enrich our understanding of how human brains compute linguistic information at a cognitive level However it is insufficient by only focusing on the neurocognitive dimension of speech production given that individuals speech production can be subject to various individual differences factors either cognitively affectively or socio culturally It is therefore necessary to move beyond the neurocognitive understanding of speech production by taking every possible

perspective into consideration Individual difference as an umbrella term covers psychological traits personal characteristics cognitive and emotional components that distinguish learners from each other Given that individual difference factors can reveal disparities in L2 learning and performance among learners such factors have attracted researchers growing interest concerning their influences on L2 speech processing their relationships with L2 speech performance and their contributions to L2 speech development Nevertheless our understanding of L2 speech production is not only insufficient compared to other L2 skills such as writing and reading but also limited to the neurocognitive account of L2 speech production More research therefore is in urgent need to uncover the influence of various individual differences factors on L2 speech production from multidisciplinary perspectives **Bilingual Educational Publications in Print** ,1983
