ILION, NEW YORK, U.S.A.

until breech bolt can pass over it, and close the action. (This is possible only in rifles of .25, .30 and .32 calibers; in the .35 caliber rifle but four cartridges may be placed in the magazine due to the larger diameter of the .35 caliber cartridge. The capacity of the .35 caliber rifle is therefore but five shots.)

To Set Safety:

Move Safety (located on the right side of rifle) upward as far as possible. The word "Safe" will be exposed and the slot in the side of the receiver closed (Figure 1). The trigger cannot now be pulled or the action opened. This prevents the possibility of jarring action open if rifle is struck upon butt plate.

Figure 3

To Load Magazine with Clip:

Open action and place clip of five cartridges in position as in Figure 5, being careful to engage legs on side of clip into notches in top of receiver; then press column of cartridges downward into magazine until last cartridge is retained by spring. Remove empty clip and release breech bolt by pressing magazine indicator (Fig. 4).

To Fire:

Move Safety downward to cover the word "Safe" and pull trigger for first shot, after which the force of recoil will extract and eject empty shell and barrel will be reloaded. It is important that trigger be released for each shot. After last shot is fired, the action will remain open.

To Unload Barrel; But Leave Magazine Loaded:

Open action just far enough to allow cartridge in barrel to eject, and hold down top cartridge in magazine so breech bolt may close over it.

To Unload Magazine Without Feeding Into Barrel:

Open action while pressing upward the magazine indicator to lock breech bolt open. Push forward, with finger or some implement, the top cartridge in magazine until it is released from side walls; then lift out. Repeat until last cartridge is removed.

To Take Down:

If action is open, close it by pressing magazine indicator (Figure 4). Loosen the fore end screw and remove fore end. Loosen takedown screw by its lever (Figure 6), and unscrew until free from the receiver but not out of jacket head. Pull barrel and jacket from receiver. Replace fore end on jacket. Rifle is now ready for packing.

to about 1995 when microprocessors began to be commoditized Each volume will focus on a range of technologies or a class

increased speed and performance significantly and led to the first true computers in ENIAC EDSAC and EDVAC which used

machines were to operate along with some innovative ideas in software and programming languages By the end of the 1950s
the design development programming and use of computing machines were in full ferment as many new ideas were proposed
many different machines were designed and some were constructed Computing machines became a commercial enterprise
