### **Abstract**

Remote Desktop Gateway (RD Gateway), formerly Terminal Services Gateway (TS Gateway), in the Windows Server® 2008 R2 operating system, provides technologies that enable authorized remote users to connect to resources on an internal corporate or private network, from any Internet-connected device that can run the Remote Desktop Connection (RDC) client. In this guide, we will set up an RD Gateway server to use for connecting to a Remote Desktop Session Host (RD Session Host) server by using a Remote Desktop client computer.
