*The Global Automotive Industry* Paul Nieuwenhuis, Peter Wells, 2015-10-12 The automotive industry is still one of the world's largest manufacturing sectors but it suffers from being very technology focused as well as being relatively short term focused There is little emphasis within the industry and its consultancy and analyst supply network on the broader social and economic impacts of automobility and of the sector that provides it The Global Automotive Industry addresses this need and is a first port of call for any academic official or consultant wanting an overview of the state of the industry An international team of specialist researchers both from academia and business review and analyse the key issues that make vehicle manufacturing still the world's premier manufacturing sector closely tied in with the fortunes of both established and newly emerging economies In doing so it covers issues related to manufacturing both established practices as well as new developments issues relating to distribution marketing and retail vehicle technologies and regulatory trends and crucially labour practices and the people who build cars In all this it explains both how the current situation arose and also likely future trajectories both in terms of social and regulatory trends as the technological marketing and labour practice responses to those leading in many cases to the development of new business models Key features Provides a global overview of the automotive industry covering its current state and considering future challenges Contains contributions from international specialists in the automotive sector Presents current research and sets this in an historical and broader industry context Covers threats to the industry including globalization economic and environmental sustainability The Global Automotive Industry is a must have reference for researchers and practitioners in the automotive industry and is an excellent source of information for business schools governments and graduate and undergraduate students in automotive engineering

**Autocar**, 2004 Sustainable Mobility Engineering Benedikt Krams, 2017-06-29 Der Gestaltung nachhaltiger Mobilitätskonzepte in Deutschland kommt eine zu geringe Bedeutung zu Insbesondere der

Paradigmenwechsel zu einer postfossilen Mobilität und zu lokal emissionsfreien Lösungen mit Elektrofahrzeugen gestaltet sich langwierig. Dieses Buch folgt einem interdisziplinären Ansatz im Kontext der angewandten Wissenschaften um dem breiten Gestaltungs- und Lösungsraum im Zusammenhang mit einer nachhaltigen Mobilität gerecht zu werden. Dazu folgen die Ausführungen dem Erkenntnisziel Sustainable Mobility Engineering als Mehrwortterminus vor dem Hintergrund zweier Anwendungsfälle von Gemeinschaftsverkehren für den ländlichen Raum, die die Elektromobilität und das ehrenamtliche Engagement herausstellen zu definieren. Bei den Anwendungsfällen handelt es sich um Bürgerauto und Bürgerbusverkehre, die mit elektrisch betriebenen Fahrzeugen realisiert werden. Das Gestaltungsziel der Arbeit ist die Ableitung praxeologischer Aussagen anhand des Fallbeispiels eines e-Bürgerautos. Hierzu werden Forschungsergebnisse zu Betriebsleistung und Kosten dargestellt. Eine Well-to-Wheel-Analyse durchgeführt sowie reichweitenbeeinflussende Parameter der eingesetzten Elektrofahrzeuge untersucht. Empirisch sozialwissenschaftliche Erhebungen anhand von Fragebogenbasierten Untersuchungen der ehrenamtlichen Fahrer sowie der Fahrgäste werden analysiert. Die Arbeit zeigt abschließend Handlungsempfehlungen für interessierte Vertreter von öffentlichen Einrichtungen für anwendungsorientierte Wissenschaftler, die sich mit nachhaltigen Mobilitätskonzepten befassen sowie für Kommunen und deren Bürger auf Basis der Untersuchungen. Ein Ausblick weist weiteren Handlungsbedarf für die Verstärkung von Gemeinschaftsverkehren in ländlich geprägten Räumen mit Elektrofahrzeugen auf und motiviert Maßnahmen zur Professionalisierung von Gemeinschaftsverkehren.

**The Innovation Odyssey** Christophe Midler, Marc Alochet, Christophe De Charentenay, 2023-04-21

Affordable is not typically the first adjective used to describe an electric automobile. This book traces the history of an affordable electric car from its genesis to its marketing. This history is more than a singular adventure. It is the analysis of a project that allows us to understand the key issues of strategy and management of contemporary innovation. The book features in lessons in Strategy revealing the complexity of international product development and the conditions for its implementation in today's fragmented world. Project management showing what is required to succeed in the a priori impossible challenge of a design within an alliance between five partners from four different countries. Innovation demonstrating that the electrification of mobility can be combined with affordable prices. Industrial policy using the emblematic domain of electric vehicles to illustrate the major role of public authorities in technology, the future direction of this role and the importance in the competition between Western and Chinese industries. Intrapreneurship showing that a start up is not the only context in which it is possible to attempt and experience breakthroughs. *Creative Globalization* Stéphane Callens, 2018-09-05. The purpose of this book is to draw up a picture of the transformations in the innovation systems induced by globalization or globalization. We understand the latter as the existence of new macroeconomic solidarities. These are attested since about the middle of the 1980s with the observation of a tripolar world drawn up by Kenichi Ohmae. The book intends to explain all theories of globalization as well as to clarify its relations with innovation. It constitutes an unprecedented synthesis on this theme illustrated by examples from many sectors of activity. TRENDS AND PREFERENCES: A STUDY ON ELECTRIC TWO WHEELER ADOPTION IN THE DELTAIC REGIONS OF TAMILNADU Dr. J. Selva, 2024-08-15. The world is focusing attentions emerging from erratic weather, mitigation of pollution, rapid depletion of fossil fuels and the need to ameliorate standard of living organisms. In this aspect many countries have undertaken new steps to control naturally available renewable resources and using it to create pollution free environment. The transportation segment alone estimates for about one third of total fossil fuel consumption and road transportation accounts for nearly 80% of consumption. In the area of electric mobility the automotive industry is at the cusp of a paradigm shift from internal combustion engine vehicles ICEVs. The shift of electric mobility has become necessary on the basis of fast depletion of fossil fuels, high cost of energy, effect of transportation on the environment and attentions about climate change. NEMMP 2020. 2012. The previous century has been the epoch of ICE Vehicles mainly on account of the ease of use, large quantity of availability and low price of fossil fuels. Bhale 2015. **Communities Of Innovation: How Organizations Harness Collective Creativity And Build Resilience** Patrick Cohendet, Madanmohan Rao, Ruiz Emilie, Benoit Sarazin, Laurent Simon, 2021-04-12. This is a landmark study that tackles an important black box in innovation studies i.e. communities of innovation. While conventional work focuses on formal organizations, a select group of academic leaders highlights the various communities that cut across firms and form the vital underground for processes of creativity and ideation. While targeted toward business and management, this volume is a must read for all social scientists interested in the dynamics underlying the current

knowledge economy Journal of Economic Geography This book describes the important role played by communities in innovation processes and how organizations can benefit from it A community brings together individuals who share a common passion for a given area of knowledge and can contribute to innovation at different levels capitalization of good practices problem solving sharing of expertise or development of new and creative ideas The literature has progressively identified many variants of communities such as communities of practice epistemic communities communities of interest virtual communities etc These forms of communities differ regarding the type of the specialized activities of knowledge on which they focus As practitioners and academics increasingly emphasized the needs of collaborative approaches in innovation they progressively challenged the traditional idea that innovation is mainly generated by hierarchical corporate departments and highlighted the active role that communities play in innovation processes The aim of this book is to shed light using multiple examples on the proactive and fundamental role of communities in the new innovation practices of organizations
