Incorporating in the instructional setting latest insights in the appropriate use of rubrics in the health sciences education setting.

Using Rubrics for Performance-Based Assessment Todd Stanley, 2021-10-03 Writing a rubric that can accurately evaluate student work can be tricky. Rather than a single right or wrong answer, rubrics leave room for interpretation and thus subjectivity. How does a teacher who wants to use performance-based assessment in this day and age of educational data and SMART goals find a way to reliably assess student work? The solution is to write clear rubrics that allow the evaluator to objectively assess student work. This book will show classroom teachers not only how to create their own objective rubrics which can be used to evaluate performance assessments but also how to develop rubrics that measure hard-to-assess skills such as leadership and grit and how to empower their own students to create rubrics that are tailored to their work.

Rubric Assessment Goes to College Mary J. Goggins Selke, 2013-01-25 On campuses across the United States and beyond, schools of business, education, law, liberal arts, management, medical professions, pharmacy, and physical or social sciences are beginning to use assessment rubrics for purposes of formative and summative evaluation. A concise yet comprehensive guide to rubric usage, this book is an essential tool for university, professional school, college, community college, and upper-level secondary school faculty members. It contains one-stop rubric shopping for key considerations, common problems, specific design steps, implementation samples, standards alignment, and grade-focused applications. Effective college-level rubrics that are the right tools for objective, comprehensive assessment can be constructed almost as easily as an ice cream sundae. Welcome aboard as *Rubric Assessment Goes to College*.

Teaching and Learning at a Distance Michael Simonson, Susan M. Zvacek, Sharon Smaldino, 2019-07-01 Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in service teachers and for training programs that discuss teaching distant learners or managing distance education systems This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs The teacher or trainer who uses this book will be able to distinguish between appropriate uses of distance education In this text we take the following themes The first theme is the definition of distance education Before we started writing the first edition of Teaching and Learning at a Distance we carefully reviewed the literature to determine the definition that would be at the foundation of our writing This definition is based on the work of Desmond Keegan but is unique to this book This definition of distance education has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica The second theme of the book was the importance of research to the development of the contents of the book The best practices presented in Teaching and Learning at a Distance are validated by scientific evidence Certainly there are rules of thumb but we have always attempted to only include recommendations that can be supported by research The third theme of Teaching and Learning at a Distance is derived from Richard Clark s famous quote published in the Review of Educational Research that states that media are mere vehicles that do not directly influence achievement Clark s controversial work is discussed in the book but is also fundamental to the book s advocacy for distance education in other words we authors did not make the claim that education delivered at a distance was inherently better than other ways people learn Distance delivered instruction is not a magical approach that makes learners achieve more The fourth theme of the book is equivalency theory Here we presented the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face to face classroom The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive that it should cover as much of the various ways instruction is made available to distant learners as is possible It should be a single source of information about the field
