Applications of Herbal Medicine to Control Chronic Kidney Disease: Volume II Jianping Chen,Ying-Yong Zhao,Karl Tsim,2023-01-03 **Unconventional resources: provenance analysis, sediment transport, reservoir evaluation, geo-energy** Wenguang Wang,Xixin Wang,Chao Liu,Yongqiang Chen,Yihuai Zhang,2025-04-09 Download the ebooks for this Research Topic Volume I A PDF EPUB Volume I B PDF EPUB With the deepening of theoretical understanding and the progress of exploration and development techniques a series of major breakthroughs have been made in the global exploration and development of unconventional oil and gas Global unconventional oil and gas production is growing rapidly and its role in global energy supply is becoming increasingly prominent Unconventional oil and gas reservoirs have poor physical properties generally with porosities of 2% 10% and permeabilities of 0.001 1 10⁻³ mD The basic types include tight sandstone mud shale tight carbonate etc Unconventional oil and gas resources are very rich and it is necessary to conduct in depth research on provenance analysis sediment transport reservoir evaluation and geo energy The purpose of this Research Topic is to provide operational evaluation ideas for unconventional resource prediction through the study of unconventional reservoir provenance analysis sediment transport reservoir evaluation and geo energy and ultimately serve oil and gas exploration practice The different provenance controls the distribution of sedimentary facies in the vertical and lateral directions which in turn control the spatial distribution of the grain size and clastic composition The study of provenance analysis and sediment transport can integrate tectonics climate provenance lithotypes transport dynamics and burial diagenesis which can provide a comprehensive understanding of unconventional reservoirs The modelling of unconventional reservoirs is mainly aimed at reservoirs with original reservoirs tight and generally no natural industrial output requiring artificial reconstruction a large number of horizontal wells or branch wells and other targeted mining technologies to improve productivity The modeling of unconventional reservoir mainly uses horizontal well data Different from conventional reservoir modeling the modelling of unconventional reservoir involves sweet spot characterization and artificial fracture establishment This Research Topic will focus on provenance analysis sediment transport reservoir evaluation and geo energy of unconventional reservoirs It will be primarily devoted to research papers and review papers Pioneering research papers in the field of experimental and numerical simulation are encouraged to submit their work The scope includes but are not limited to Provenance lithotype and sediment transport pathways Diagenesis and reservoir quality Diagenesis numerical simulation and seismic diagenetic facies Data processing and application Implication of machine learning and artificial intelligence to trace sediment transport Controlling effect of provenance on ore bearing reservoirs and deposits Formation mechanism of sedimentary type deposits iron uranium bauxite etc **Waste Management** Gunjan Mukherjee,Sunny Dhiman,2022-10-27 Solid and liquid wastes generated as a result of various agricultural municipal industrial and several other processes have become a global concern This book provides detailed information on eco friendly

approaches and low cost strategies for solid and liquid waste management It emphasizes how these wastes can be utilized as alternatives to expensive raw materials thus encouraging sustainable development This book will be useful to all those who have a keen interest in waste management processes Reservoir Formation Conditions and Enrichment Mechanisms of

Shale Oil and Gas Kun Zhang, Shu Jiang, Jijun Li, Dadong Liu, Jingqiang Tan, 2023-05-15 **Microbial Involvement in Biogeochemical Cycling and Contaminant Transformations at Land-Water Ecotones** Yizhi Sheng, Xiangfeng Zeng, Linduo Zhao, Yongbin Li, Min Zhang, 2024-12-17 The land water ecotones such as coastal areas wetlands riverine zones and aquifer recharge areas serve as important transition zones fostering intricate biogeochemical processes between terrestrial and aquatic ecosystems These environments harbor unique environmental conditions shaped by the close proximity of land and water bodies Within these ecotones microorganisms bacteria archaea fungi etc play a pivotal role in driving nutrient biogeochemical cycles and removing contaminants Given the diverse anthropogenic activities and intensive and complex mass and energy exchanges comprehending these biogeochemical processes presents a formidable challenge

Proteomics in Foods Fidel Toldrá, Leo M. L. Nollet, 2012-12-16 Food proteomics is one of the most dynamic and fast developing areas in food science The goal of this book is to be a reference guide on the principles and the current and future potential applications of proteomics in food science and technology More specifically the book will discuss recent developments and the expected trends of the near future in food proteomics The book will be divided into two parts The first part 7 chapters will focus on the basic principles for proteomics e g sample preparation such as extraction and separation techniques analytical instrumentation currently in use and available databases for peptide and protein identification The second part of the book 26 chapters will focus on applications in foods It will deal with quality issues related to post mortem processes in animal foods and quality traits for all foods in general as well as the identification of bioactive peptides and proteins which are very important from the nutritional point of view Furthermore consumers are now extremely susceptible to food safety issues and proteomics can provide reassurance with different safety aspects such as food authenticity detection of animal species in the food and identification of food allergens All of these issues will be covered in this book It is also worth noting that both editors are internationally recognized experts in the field of food science and both have edited numerous food science books and handbooks **Encyclopedia of Pharmacy Practice and Clinical Pharmacy**

,2019-06-28 *Encyclopedia of Pharmacy Practice and Clinical Pharmacy* Three Volume Set covers definitions concepts methods theories and applications of clinical pharmacy and pharmacy practice It highlights why and how this field has a

significant impact on healthcare The work brings baseline knowledge along with the latest most cutting edge research In addition new treatments algorithms standard treatment guidelines and pharmacotherapies regarding diseases and disorders are also covered The book s main focus lies on the pharmacy practice side covering pharmacy practice research pharmacovigilance pharmacoeconomics social and administrative pharmacy public health pharmacy pharmaceutical systems research the future of pharmacy and new interventional models of pharmaceutical care By providing concise expositions on a broad range of topics this book is an excellent resource for those seeking information beyond their specific areas of expertise This outstanding reference is essential for anyone involved in the study of pharmacy practice Provides a one stop resource for access to information written by world leading scholars in the field Meticulously organized with articles split into three clear sections it is the ideal resource for students researchers and professionals to find relevant information Contains concise and accessible chapters that are ideal as an authoritative introduction for non specialists and readers from the undergraduate level upwards Includes multimedia options such as hyperlinked references and further readings cross references and videos

Innovative Food Processing Technologies ,2020-08-18 Food process engineering a branch of both food science and chemical engineering has evolved over the years since its inception and still is a rapidly changing discipline While traditionally the main objective of food process engineering was preservation and stabilization the focus today has shifted to enhance health aspects flavour and taste nutrition sustainable production food security and also to ensure more diversity for the increasing demand of consumers The food industry is becoming increasingly competitive and dynamic and strives to develop high quality freshly prepared food products To achieve this objective food manufacturers are today presented with a growing array of new technologies that have the potential to improve or replace conventional processing technologies to deliver higher quality and better consumer targeted food products which meet many if not all of the demands of the modern consumer These new or innovative technologies are in various stages of development including some still at the R D stage and others that have been commercialised as alternatives to conventional processing technologies Food process engineering comprises a series of unit operations traditionally applied in the food industry One major component of these operations relates to the application of heat directly or indirectly to provide foods free from pathogenic microorganisms but also to enhance or intensify other processes such as extraction separation or modification of components The last three decades have also witnessed the advent and adaptation of several operations processes and techniques aimed at producing high quality foods with minimum alteration of sensory and nutritive properties Some of these innovative technologies have significantly reduced the thermal component in food processing offering alternative nonthermal methods Food Processing Technologies A Comprehensive Review Three Volume Set covers the latest advances in innovative and nonthermal processing such as high pressure pulsed electric fields radiofrequency high intensity pulsed light ultrasound irradiation and new hurdle technology Each section will have an introductory article covering the basic principles and

applications of each technology and in depth articles covering the currently available equipment and or the current state of development food quality and safety application to various sectors food laws and regulations consumer acceptance advancements and future scope It will also contain case studies and examples to illustrate state of the art applications Each section will serve as an excellent reference to food industry professionals involved in the processing of a wide range of food categories e g meat seafood beverage dairy eggs fruits and vegetable products spices herbs among others **Lake Records of Environmental and Climate Change on the Tibetan Plateau** Zhang Chengjun,Steffen Mischke,Yongli Wang,2022-11-07 Cumulated Index Medicus ,1995 **Index Medicus** ,2004 Vols for 1963 include as pt 2 of the Jan issue Medical subject headings **Redox Indicators. Characteristics and Applications** Sam Stuart,2013-09-11 Redox Indicators Characteristics and Applications presents the basic definitions concerning redox indicators as well as parameters influencing the titration error This book discusses the corresponding equations related to redox indicators This text then examines the properties of most used redox indicators together with their common applications This book provides several comments on the analytical characteristics of redox indicators This text also discusses the formal redox potential that corresponds to the redox potential in solution at which the analytical concentrations of the reduced and oxidized forms of the indicator are equal This book discusses as well information relevant in characterizing the indicator for analytical purposes including purity of indicator sample the manner of use the systems and the preparation of indicator solution Pure and applied chemists will find this book useful *Hazardous pollutants in agricultural soil and environment* Reeta Goel,Pankaj Chaturvedi,Saurabh Kumar,Ravindra Soni,Deep Chandra Suyal,2024-04-30 *Mesenchymal Stem Cell Senescence and Rejuvenation* Yuelin Zhang,Songyan Liao,Qingling Fu,Mark Hamrick,2022-01-18 Dissertation Abstracts International ,2005 Economic Geology ,2001
