

ANESTHESIOLOGY PROGRAM LETTER OF RECOMMENDATION SAMPLE

Dear program director,

Working with Regine Louise at Orlando Health Medical Center was one of the most pleasing times. Together with other medical practitioners, they were able to design appropriate treatment plans for different patients under my supervision, something that made me to enjoy my work. It was always a joy to work in a team that was innovative, creative and at the same time hardworking. I feel it important to speak on behalf of Regine, who is applying to a master's program in anesthesiology in your prestigious institution.

Regine researched the best treatment methods, which triggered the minds of other staff to think beyond what they learned in medical school. Due to this, she was able to understand various diseases, which resulted in attending to patients with high level of precision. Although attending to a diverse population of patients has challenges, she was able to comprehend the problem of every infirm, and came up with a solution.

Furthermore, she worked as a medical assistant, with responsibilities of documenting patients' history, administering tests, among others. She was able to make independent decisions in formulating the treatment plan. In the same vein, Regine practiced as a pediatric resident, a primary care physician and attended observership, internship, and externship. She talked to patients for hours, connecting with them on a personal level and listening to their life stories. The roles make her an ideal candidate for this anesthesiology program.

I feel more honored to forward my opinions regarding Regine to you, and it's my great hope that she will get admission in your institution. Her academic qualifications and experiences are unparalleled, which makes me recommend her without hesitation.

Sincerely,
Dr.Erick

The Essential Guide to Medical Staff Reappointment Anne Roberts, 2008 **The Medical Staff Leaders' Practical Guide** William K. Cors, Mary J. Hoppa, MD, MBA, Mary J. Hoppa, Richard A. Sheff, 2007

You are a great clinician. But do you have the tools to become a great leader? Physicians who accept or are assigned leadership positions are too often left on their own to develop leadership skills and educate themselves on their responsibilities as medical staff leaders. These physicians may be great clinicians and enthusiastic about taking a leadership position, but neither of these characteristics automatically makes a great leader. Get practical answers for physicians in leadership. The Medical Staff Leaders' Practical Guide, Sixth Edition, provides direction for physician leaders in hospitals, those who remain primarily clinicians but who also accept positions of leadership in the hospital or medical staff organization. It gives an overview of physician leaders' roles and responsibilities in credentialing, privileging, bylaws development, performance improvement, physician management, and board/physician relations. Completely revamped and updated, this essential resource for medical staff leaders includes tools and information needed to fulfill leadership responsibilities for all medical staff leaders, including directors of medical staff offices, vice presidents of medical affairs, medical staff presidents, credentials committee chairs and members, and department chairs. Expanded analysis and strategies for overcoming current medical staff leadership challenges, including merger issues, medical staff development plans, physician practice evaluations, assessing and improving clinical competence, and more. Guidance and how-to advice on creating a positive medical staff culture, minimizing distrust or conflict, and improving policies. Tips and insights from experienced medical staff leaders currently working in hospitals. How do you keep up with evolving roles? As relationships continue to evolve between hospitals and medical staff, it is especially important for physician leaders to be well educated about credentialing, privileging, conflicts of interest, medical staff organization, the roles of various physician leaders and committees, performance improvement, and more. This practical guide includes in-depth reviews of the top five medical staff leadership responsibilities: Medical staff structure and governance; Credentialing and privileging; Peer review and performance improvement; Hospital medical staff collaboration; Medical staff culture. Rise to the challenge of leadership. Written by experienced medical staff leaders currently working in hospitals. The Medical Staff Leaders' Practical Guide, Sixth Edition, gives physicians the tools they need to meet the challenges of a leadership role. The tools and advice in this guide will help you overcome physician apathy, poor meeting attendance, lack of volunteers for leadership positions, and turf battles. Improve peer review, evaluation of physician competency, and physician/hospital relations. Deal with disruptive and impaired physicians, conflicts of interest, exclusive contract problems, accreditation challenges, and emergency department coverage challenges. Create a positive working environment. Gain a better understanding of the credentialing and privileging process. Take a look at the table of contents. Introduction. Today's Effective Medical Staff.
