

F. Referencing

You can use either footnotes or in-text citations. In either case, the citation should include the author and year, e.g., (Smith 2023). When quoting some text or referring to a specific passage or argument, you should also include the page number, e.g. (Smith 2023, p. 66).

Full details should appear in the bibliography at the end of your essay (e.g., Smith, J. 2023. *My Brilliant Book About Human Nature*. Canterbury: Canterbury University Press).

Feel free to use any standard referencing system (e.g., APA, Chicago, MLA etc.). If in doubt, copy the system used in any academic book or article in the course reading list.

Essays on Reference, Language, and Mind Keith Donnellan, 2012-07-26 This volume presents a highly focused collection of articles by Donnellan In the late 1960s and early 1970s the philosophy of language and mind went through a paradigm shift with the then dominant Fregean theory losing ground to the direct reference theory sometimes referred to as the direct reference revolution Donnellan played a key role in this shift focusing on the relation of semantic reference a touchstone in the philosophy of language and the relation of thinking about a touchstone in the philosophy of mind

Perception, Realism, and the Problem of Reference Athanassios Raptopoulos, Peter Machamer, 2012-04-12 The chapters in the book address the problem of reference as it relates to perception and to debates about realism

On Reference Andrea Bianchi, 2015 What exactly is reference And how can we characterize the semantic properties involved Eighteen leading experts address the problems and debates that have arisen from these questions over the last century They contribute to our understanding of the nature of reference its role in cognition and the place it should be given in semantic theory

Fixing Reference Imogen Dickie, 2015-12-03 Imogen Dickie develops an account of aboutness fixing for thoughts about ordinary objects and of reference fixing for the singular terms we use to express them Extant discussions of this topic tread a weary path through descriptivist proposals causalist

alternatives and attempts to combine the most attractive elements of each The account developed here is a new beginning It starts with two basic principles The first connects aboutness and truth a belief is about the object upon whose properties its truth or falsity depends The second connects truth and justification justification is truth conducive in general and allowing exceptions a subject whose beliefs are justified will be unlucky if they are not true and not merely lucky if they are These principles one connecting aboutness and truth the other truth and justification combine to yield a third principle connecting aboutness and justification a body of beliefs is about the object upon which its associated means of justification converges the object whose properties a subject justifying beliefs in this way will be unlucky to get wrong and not merely luck to get right The first part of the book proves a precise version of this principle Its remaining chapters use the principle to explain how the relations to objects that enable us to think about them perceptual attention understanding of proper names grasp of descriptions do their aboutness fixing and thought enabling work The book includes discussions of the nature of singular thought and the relation between thought and consciousness

God in the Act of Reference Erica Appelros, 2017-03-02 To claim to believe in God without accepting that God exists independently of human minds would mean reducing God to merely a human construct thus not real enough for being the object of religious worship This book sets out to challenge this common view on existence and religious belief Arguing from concrete examples of language use in children s make believe play and other ordinary situations Erica Appelros suggests that what makes us consider something to be real involves our capacities to relate to our surroundings not only on grounds of their physical characteristics but also on grounds of human construction This book makes a substantial contribution to the contemporary debate within philosophy of religion on religious realism and non realism and suggests innovative and constructive solutions to the perennial philosophical and religious issue of what is meant by talking about God and God s existence

Reference without Referents R. M. Sainsbury, 2005-05-05 Reference is a central topic in philosophy of language and

has been the main focus of discussion about how language relates to the world R M Sainsbury sets out a new approach to the concept which promises to bring to an end some long standing debates in semantic theory There is a single category of referring expressions all of which deserve essentially the same kind of semantic treatment Included in this category are both singular and plural referring expressions Aristotle The Pleiades complex and non complex referring expressions The President of the USA in 1970 Nixon and empty and non empty referring expressions Vulcan Neptune Referring expressions are to be described semantically by a reference condition rather than by being associated with a referent In arguing for these theses Sainsbury's book promises to end the fruitless oscillation between Millian and descriptivist views Millian views insist that every name has a referent and find it hard to give a good account of names which appear not to have referents or at least are not known to do so like ones introduced through error Vulcan ones where it is disputed whether they have a bearer Patanjali and ones used in fiction Descriptivist theories require that each name be associated with some body of information These theories fly in the face of the fact names are useful precisely because there is often no overlap of information among speakers and hearers The alternative position for which the book argues is firmly non descriptivist though it also does not require a referent A much broader view can be taken of which expressions are referring expressions not just names and pronouns used demonstratively but also some complex expressions and some anaphoric uses of pronouns Sainsbury's approach brings reference into line with truth no one would think that a semantic theory should associate a sentence with a truth value but it is commonly held that a semantic theory should associate a sentence with a truth condition a condition which an arbitrary state of the world would have to satisfy in order to make the sentence true The right analogy is that a semantic theory should associate a referring expression with a reference condition a condition which an arbitrary object would have to satisfy in order to be the expression's referent Lucid and accessible and written with a minimum of technicality Sainsbury's book also includes a useful historical survey It will be of interest to those working in logic mind and metaphysics as well as essential reading for philosophers of language

Reference, Truth and Conceptual Schemes G. Forrai, 2013-03-14 1 HISTORICAL BACKGROUND The purpose of the book is to develop internal realism the metaphysical epistemological doctrine initiated by Hilary Putnam Reason Truth and History Introduction Many Faces In doing so I shall rely sometimes quite heavily on the notion of conceptual scheme I shall use the notion in a somewhat idiosyncratic way which however has some affinities with the ways the notion has been used during its history So I shall start by sketching the history of the notion This will provide some background and it will also give opportunity to raise some of the most important problems I will have to solve in the later

chapters The story starts with Kant Kant thought that the world as we know it the world of tables chairs and hippopotami is constituted in part by the human mind His central argument relied on an analysis of space and time and presupposed his famous doctrine that knowledge cannot extend beyond all possible experience It is a central property of experience he claimed that it is structured spatially and temporally However for various reasons space and time cannot be features of the world as it is independently of our experience So he concluded that they must be the forms of human sensibility i e necessary ingredients of the way things appear to our senses
