

## Regular Polygons and Angle Relationships (pp. 1 of 7)

### Part I

In Unit 3, Geometric Patterns, conjectures were made about the interior angle sum for polygons. A regular polygon is both equilateral and equiangular. Suppose each of the polygons below is regular and divided into triangular regions as shown.

1. What is the interior angle sum for the triangle? How do you know?
2. Based on your answer to question 1, what is the interior angle sum of the regular quadrilateral? Explain.
3. Based on your answer to question 1, what is the interior angle sum of the regular pentagon? Explain.
4. Use your reasoning to complete the table below.

Polygon Name	Number of Sides	Number of Triangular Regions	Process to Find the Sum of the Interior Angles	Sum of the Interior Angles
Triangle	3			180
Quadrilateral				
Pentagon				
Hexagon				
n-gon				

5. Based on the data in the table, describe how the angle sum changes as additional sides are added to the polygon?
6. What does your answer to question 5 lead you to believe about the algebraic relationship between the interior angle sum and the number of sides of the polygon?
