 reinforced concrete structures Written on the basis of the British BS and European Eurocode codes of practices this book is  
 primarily meant for the undergraduate students of civil engineering It will also be highly useful for structural engineers  
 working in the fields of design consultancy and construction involving reinforced concrete structures The text is organized  
 into four parts each dealing with the analysis and design of a specific type of reinforced concrete structure The first part  
 covers the multi storeyed administrative office building The second part deals with the elevated storage bin structure used in  
 steel plants The elevated structural framework subjected to mechanical vibration is the subject matter of the third part The  
 fourth and final part discusses the precast reinforced concrete workshop building The important activities required to be  
 carried out prior to structural analysis structural arrangement planning materials selection examination of buildability and
