### Factor: Species Identity: Lab Dataset Overview

multivariate is concerned the data (multivariate) and the dimensionality together give through the vector space. vectors, since describing the position in 3D space

How many dimensions does the space occupy the dimensionality shows how big is the space. Example: 3D space with three dimensions. All vectors are in the 3D space, described, represented and defined.

How the multivariate space is defined, where the coordinates, describing the point, usually 3 numbers. factor, color and identity the data is associated the species.

How principal component factor (multivariate) is reduced and dimension is reduced to.

How are variables that are highly correlated, reduced, multivariate space is reduced using principal component analysis through principal component analysis (PCA) in a single factor.
