Geneva Health Forum 2022 Poster Book Antoine Flahault, Antoine Geissbuhler, Véronique Maye, Bruno Lab, 2023-12-18 Social and environmental crises are increasingly impacting the health of populations Inequalities in access to care are growing and the current design of health systems is becoming increasingly fragile and inadequate to address these challenges It is crucial to reinvent a new approach to global health that takes into account the current social and environmental crises further involves civil society and academia and harnesses the opportunities of digital development In these times of significant international tension it is of utmost

importance for Geneva to reinforce its unique position as a neutral platform for multilateral dialogue The Geneva Health Forum GHF is a platform for innovative practices in global health and a space for science based and inclusive diplomacy Established in 2006 by the University Hospitals of Geneva HUG and the University of Geneva UNIGE the Geneva Health Forum is organised in close collaboration with 24 partners including prominent international organisations based in Geneva such as the WHO the International Committee of the Red Cross ICRC Global Fund GAVI Médecins Sans Frontières MSF and the UN The mission of the Geneva Health Forum is to contribute to the improvement in health and access to health care worldwide To achieve this goal it aims to give visibility to innovative field experience to establish a constructive dialogue between global health actors from different sectors as well as to foster collaborations between them

Carrión Ecology, Evolution, and Their Applications M. Eric Benbow, Jeffery K. Tomberlin, Aaron M. Tarone, 2025-07-17 The first edition of Carrión Ecology Evolution and Their Applications brought together multiple scientific disciplines to shed light on the importance of carrion within the context of ecology and evolutionary biology and through applications ranging from human mass disasters to habitat ecosystem conservation This second edition builds upon this foundation to include a huge amount of new research consisting of 33 chapters 9 brand new and the remaining 24 substantially updated and expanded One of the most significant changes for this edition is the coverage of aquatic ecosystems both freshwater and marine The book is now represented by 73 authors from eight countries incorporating more diverse perspectives and engagement into this multidisciplinary and expanding science The resulting new edition showcases a broader scope of topics geographic areas ecosystems and history of carrion ecology evolution and their applications for humanity It provides the most comprehensive resource on carrion from all ecosystems of the world The student academic and professional will find this book insightful providing new insights for the fields of molecular ecology microbiology entomology population biology community and ecosystem ecology as well as applications in forensics and human and environmental health

Restoring Community Connections to the Land María E. Fernández-Giménez, 2012 The rangelands of China and Mongolia encompass diverse landscapes of global environmental and cultural significance Pastoralists in these two nations share much common history and tradition including their nomadic heritage and twin eras of collectivized production under different centrally planned socialist regimes This unique collection of case studies describes the change loss re emergence and resilience of seven herder communities located in distinct socio ecological settings ranging from the Gobi desert of Mongolia to the Tibetan Plateau regions of China's Sichuan and Gansu Provinces Useful for policy makers within international development and conservation policy this book is also of interest for researchers and students of rural economics and agriculture

The Carbon Fix Stephanie Paladino, Shirley J Fiske, 2016-11-18 Given the growing urgency to develop global responses to a changing climate The Carbon Fix examines the social and equity dimensions of putting the world's forests and necessarily the rural people who manage and depend on them at the center of climate policy efforts such as REDD intended to slow global

warming The book assesses the implications of international policy approaches that focus on forests as carbon and especially forest carbon offsets for rights justice and climate governance Contributions from leading anthropologists and geographers analyze a growing trend towards market principles and financialization of nature in environmental governance placing it into conceptual critical and historical context The book then challenges perceptions of forest carbon initiatives through in depth field based case studies assessing projects policies and procedures at various scales from informed consent to international carbon auditing While providing a mixed assessment of the potential for forest carbon initiatives to balance carbon with social goals the authors present compelling evidence for the complexities of the carbon offset enterprise fraught with competing interests and interpretations at multiple scales and having unanticipated and often deleterious effects on the resources and rights of the world s poorest peoples especially indigenous and rural peoples The Carbon Fix provides nuanced insights into political economic and ethical issues associated with climate change policy Its case approach and fresh perspective are critical to environmental professionals development planners and project managers and to students in upper level undergraduate and graduate courses in environmental anthropology and geography environmental and policy studies international development and indigenous studies *Science and Environment in Chile* Javiera Barandiaran, 2018-07-31 The politics of scientific advice across four environmental conflicts in Chile when the state acted as a neutral broker rather than protecting the common good In *Science and Environment in Chile* Javiera Barandiaran examines the consequences for environmental governance when the state lacks the capacity to produce an authoritative body of knowledge Focusing on the experience of Chile after it transitioned from dictatorship to democracy she examines a series of environmental conflicts in which the state tried to act as a neutral broker rather than the protector of the common good She argues that this shift in the role of the state occurring in other countries as well is driven in part by the political ideology of neoliberalism which favors market mechanisms and private initiatives over the actions of state agencies Chile has not invested in environmental science labs state agencies with in house capacities or an ancillary network of trusted scientific advisers despite the growing complexity of environmental problems and increasing popular demand for more active environmental stewardship Unlike a high modernist empire state with the scientific and technical capacity to undertake large scale projects Chile s model has been that of an umpire state that purchases scientific advice from markets After describing the evolution of Chilean regulatory and scientific institutions during the transition Barandiaran describes four environmental crises that shook citizens trust in government the near collapse of the farmed salmon industry when an epidemic killed millions of fish pollution from a paper and pulp mill that killed off or forced out thousands of black neck swans a gold mine that threatened three glaciers and five controversial mega dams in Patagonia Current Advances in Ecological & Environmental Sciences, 1996 Forests and Insects Allan D. Watt, Nigel E. Stork, Mark D. Hunter, 1997-09-30 This book covers the full breadth of forest entomology It combines the work of forest entomologists working on the impact and management of forest pests with those involved in

diversity assessment and conservation of insects in forests Forests and Insects demonstrates that both these disciplines demand an understanding of population and community biology The book covers such topics as colonization of trees by insects population dynamics of forest insects insect natural enemies the effects of climate change and pollution on forest pests spatial variation in the abundance of insects the mineralization of carbon by termites the impact of herbivorous insects and the conservation of forest insect diversity including the effects of forest fragmentation and deforestation This Royal Entomological Society Symposium volume will be of great interest to all agricultural and forest entomologists population and community biologists pest management specialists and anyone concerned with the conservation of forest biodiversity
