ITIL® Release, Control & Validation

Course Description:

ITIL is comprised of five core publications: Service Strategy, Service Design, Service Transition, Service Operations and Continual Service Improvement, promoting alignment with the business as well as improving operational efficiency. The official ITIL® qualification scheme describes two streams, the Service Lifecycle Stream and the Service Capability stream.

The Service Lifecycle stream focuses on ITIL practices within the Service Lifecycle context. The prime focus is the Lifecycle itself as well as the process and practice elements used within it.

The Service Capability stream is for those who wish to obtain an in-depth understanding of ITIL processes and roles. Attention to the Service Lifecycle is illustrated as part of the curriculum but the primary focus is the on the process activities, execution and use throughout the Service Lifecycle.

The ITIL® RCV (Release, Control & Validation) course is part of the ITIL® Intermediate Capability certification stream. The course prepares candidates to take the ITIL® Release, Control & Validation Intermediate exam as well as providing valuable knowledge that can be implemented in the workplace.

Course and Learning Objectives:

At the end of this course, you will learn:

- The concept of Service Management as a practice
- The purpose, goal and objectives of the Change Management Process
- The purpose of the SACM process and the goal of Configuration Management
- The use of a Configuration Management System (CMS), and its major components, in supporting the effective execution of SACM process
- The purpose, goal, objectives and scope of the RDM process
- The purpose, goal and objectives of the SVT process
- The purpose, goal, objectives and scope of the KM process
- The purpose, goal, objectives and scope of the Service Evaluation process
- The purpose and scope of the Request Fulfilment process

Course Approach:

Participants will learn the principles and core elements of the Service Capability approach to IT Service Management as well as focusing on the processes & roles, activities and their execution throughout the Service Lifecycle. An interactive approach is used combining lecture, discussion and case study experience to prepare participants for the ITIL Intermediate Release, Control & Validation certification exam as well as providing valuable practical knowledge that can be rapidly applied in the workplace. Quint Wellington Redwood's integrated case study deepens the participant's appreciation of how ITIL best practices can be applied in order to improve IT performance. Practical assignments are used throughout the course to enhance the learning experience.

The EU's Approach to Human Rights Conditionality in Practice Elena Fierro, 2021-10-18 Human rights in the external relations of the EU may manifest itself in different manners one of them is the conditionality policy that the EU applies to third countries This study intends to explore the modalities of this conditionality policy as well as its nature and reach It also analyzes how the policy could be improved and be made more coherent and effective The point of departure is the division made between two modes of conditionality ex ante and ex post In the first case the EU issues conditions which must be fulfilled before the negotiation or conclusion of a given agreement or an action with a view to strengthening the relations The second case conditionality ex post is when conditions are already part of an agreement or an established relation The so called human rights clause or democratic clause incarnates the second modality This study explores both types of conditionality but puts a special emphasis on the second given its legal nature its reciprocity and its systematic inclusion in all framework agreements It is argued here that this clause could represent the basis of a fully fledged human rights policy of EU At present however the implementation of the clause has been fragmentary The interpretation that has prevailed the human rights clause being a mechanism of exclusively punitive nature has constituted an obstacle for its implementation In addition the clause has been activated only as a response to breaches of democratic principles and not human rights in the ACP countries and not other regions The human rights clause has been the victim of the sectorial approaches where policy choices were determined by the instrument at issue It is about time for the EU to revisit the interpretation of the clause in order to make of it a dynamic instrument integrated in a global and coherent external human rights policy

Fraught with Pain Pereira, Isabel, Ramírez, Lucía, 2019-09-04 This book seeks to facilitate linkages between discussions on the right to health and discussions on drug policy reform The populations we talk about here are the ones most in need of a change whereby drug culture measures cease to stand in the way of a life free from pain The suffering and pain experienced by people with terminal illnesses and people with heroin use disorder can be alleviated through opioids At the same time the enforcement of international drug control treaties means that these medicines are subjected to strict controls that create excessive red tape and contribute to generalized fear among patients and health professionals concerning these medicines use Although many opioids are included in the World Health Organization's list of essential medicines the fact that they are controlled substances means that in practice the right to health of these two populations often is violated *Fraught with Pain* offers a diagnosis of five Colombian cities with regard to the barriers that both populations patients at the end of life and individuals with heroin use disorder face when trying to access opioids The hurdles they encounter can be grouped into four categories 1 Structural failings of the Colombian health system 2 A lack of institutional capacity to maintain sufficient opioid stocks in small and medium cities 3 A lack of specialized training among health professionals in small and medium cities on the issues of palliative care and psychoactive substance use disorders 4 Stigma surrounding opioids and the people who use them Analyzing the enjoyment of the right to health among these two groups of people would seem ill advised for what could they and the health care they receive possibly have in common However this book argues that someone facing the end of life and someone with a heroin use disorder actually face similar challenges they are both in need of the same controlled substances they both require interdisciplinary treatment that extends beyond opioids they both seek health services during moments of extreme vulnerability and they are both often treated negligently by health systems that are ill equipped to handle death and drug dependence *Fraught with Pain* seeks to facilitate linkages between discussions on the right to health and discussions on drug policy reform The populations we talk about here are the ones most in need of a change whereby drug culture measures cease to stand in the way of a life free from pain Descripción tomada de <https://www.dejusticia.org/en/publication/fraught-with-pain-access-to-palliative-care-and-treatment-for-heroin-use-disorder-in-colombia>

The Inter American Court of Human Rights Natalia Zúñiga, 2022-07-05 This book provides a critical legal perspective on the legitimacy of international courts and tribunals The volume offers a critique of ideology of two legal approaches to the legitimacy of the Inter American Court of Human Rights IACtHR that portray it as a supranational tribunal whose last say on human rights protection has a transformative effect on the democracies of Latin

America The book shows how the discussion between these Latin American legal strands mirrors global trends in the study of the legitimacy of international courts related to the use of constitutional analogies and concepts such as the notion of judicial dialogue and the idea of democratic transformation It also provides an in depth analysis of how through the use of those categories legal experts studying the legitimacy of the IACtHR enact self validation processes by making themselves the principal agents of transformation These self validation processes work as ideological apparatuses that reproduce and entrench the mindset that the legal discipline is a driving force of change in itself Further the book shows how profiling the Court as an agent of transformation diverts attention from the ways in which it has pursued a particular view of human rights and democracy in the region that creates and reproduces relations of inequality and domination Rather than discarding the IACtHR this book aims to de centre the focus away from formal legal institutions engaging with the idea that ordinary people can mobilise and define the content of law to transform their lives and territories The book will be a valuable resource for scholars working in the areas of human rights law law public international law legal theory constitutional law political science and legal philosophy

The Impact of the Inter-American Human Rights System Armin von Bogdandy, Flávia Piovesan, Eduardo Ferrer Mac-Gregor, Mariela Morales Antoniazzi, 2024 This interdisciplinary volume brings together leading scholars in international and constitutional law social sciences and international relations to present a systematic as well as critical analysis of the impact of the Inter American System of Human Rights and the legal mechanisms that allow for that impact
