**Management Accounting** ,1926      **Strategic Managerial Accounting - A Primer for the IT Professional** Gopal Saxena,2017-07-12 This book probably the first written from the perspective of software professionals attempts to introduce them to the mysteries of strategic managerial accounting SMA The common view in the industry is that accounting is for the accountants despite the fact that IT professionals are regularly confronted by financial situations such as project pricing performance measurement risk estimation costs allocation etc While it is desirable and even necessary that every proposal be vetted by respective specialists the speed and reliability of the process could improve if the people who originate the proposal had knowledge of the fundamentals that go into the decision making Unfortunately most books on management accounting whether strategic or otherwise are written from the perspective of the manufacturing industry The IT and services industry on the other hand has a unique cost structure quite distinct from manufacturing which needs to be dealt with from a different perspective This book focuses on SMA in context of the IT software industry and seeks to equip the IT professional with some basics of SMA to assist them in making more informed decisions      **International Bibliography of Business History** Francis Goodall,Terry Gourvish,Steven Tolliday,2013-12-16 The field of business history has changed and grown dramatically over the last few years There is less interest in the traditional company centred approach and more concern about the wider business context With the growth of multi national corporations in the 1980s international and inter firm comparisons have gained in importance In addition there has been a move towards improving links with mainstream economic financial and social history through techniques and outlook The International Bibliography of Business History brings all of the strands together and provides the user with a comprehensive guide to the literature in the field The Bibliography is a unique volume which covers the depth and breadth of research in business history This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians      **American Accountant** ,1929
