

Refrigerator Temperature Guide

Above 40°

Any temperature above 40°F may allow bacteria to multiply rapidly.

At 40°

The U.S. Food and Drug Administration says the recommended refrigerator temperature is below 40°F.

Between 35° and 38°

The ideal refrigerator temperature is between 35°F and 38°F, below the safety threshold outlined by the FDA and above freezing. It's not uncommon for refrigerators to be a few degrees off the mark you set, so err on the side of too-cold to avoid food spoiling more quickly or potential food safety issues.

At 32°

At 32°F and below, the food in your refrigerator will start to freeze. Keep your refrigerator temperature above 32°F to avoid this, and if you want anything frozen, put it in the freezer, which should be kept below 0°F.
